October 8, 2025

To Whom It May Concern:

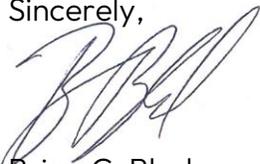

Pocatello has been privileged to have LA Semiconductor and its predecessors in our community for decades. The companies have provided numerous, well-paying jobs for our citizens and a stable economy for Pocatello.

Beyond the paycheck the companies provided to their employees, LA Semiconductor and its predecessors contributed to a stronger community. The companies donated to projects and local non-profits, such as the Portneuf Greenway, Family Services Alliance and United Way of Southeastern Idaho. The companies were also great partners for Idaho State University by collaborating on workforce development.

Creating and sustaining jobs is a priority for the City of Pocatello. When we assist employment opportunities, our community thrives. We are committed to working with companies through infrastructure development, public-private partnerships and targeted economic development incentives, when applicable.

We look forward to working with the next great employer looking to locate in that facility.

Sincerely,

Brian C. Blad
Mayor
