"I can wait on a booster. If I get sick, they can treat me with a monoclonal or oral antiviral."

Think again. Covid treatment drugs are in very short supply, while vaccine doses to give your body the boost of protection it needs are plentiful.

Boosters and masks provide strong defense from Omicron viral loads trying to get into your nose and throat. Recent Nebraska data shows that you are 36 times less likely to land in the hospital if you’ve been boosted.

Don’t wait until it’s too late. Go to your local pharmacy or Lincoln Lancaster County Health Department and get your booster TODAY.
