We can help you feel better, FAST!

Advanced Radiology physicians are now offering a revolutionary new technique that removes damaged tissue associated with tennis elbow, plantar fasciitis, jumper’s knee, Achilles tendonitis and more. Healthy tissue is protected and the results are safe, effective, and fast!

Developed at the Mayo Clinic, the Tenex TX1™ Tissue Removal System is a 20 minute outpatient procedure using local anesthetic, with:

- Minimal pain
- No surgical incision
- Little or no downtime
- No scarring or side effects
- Covered by most insurance and medicare

Don’t let plantar fascia, tennis elbow, jumper’s knee, Achilles tendon or shoulder pain slow you down!

Call 888-828-5424 to schedule your treatment today!

We are not associated in any way with Advanced Medical Imaging.

Advanced Radiology physicians were the first interventional radiologists in the country to perform the Tenex TX1™ technique.
