

Nebraska's Caregiver Tax Credit

How Eligible Family Caregivers

Can Apply

No Age Restrictions

Since 2025, a **state tax credit** has been available to help Nebraskans offset certain costs incurred while caring for loved ones of any age—from home care aides to medical equipment and home modifications.

Eligible family caregivers may qualify for a maximum annual credit of \$2,000, or up to \$3,000 for those caring for a veteran or someone with dementia.

Other expenses directly related to providing care for the eligible family member, including mileage for transportation to/from their medical appointments, may be included.

Get the support you've earned.
