Regent O'Connor,

You are not my UN representative, but I wanted to contact all of the regents to urge you to vote Yes on the resolution opposing critical race theory. I am appalled that such a divisive, destructive and actually blatantly racist doctrine is being supported and taught anywhere in the country. I do not want this nonsense taught in Nebraska. Pitting groups against one another, balkanizing us and making race, skin color, ethnicity or any other surface characteristic the defining feature of citizens in this country is just wrong. Identifying and celebrating victim groups and labelling and demonizing supposed oppressor groups is just evil. We should be judged on our abilities and the content of our characters, not our skin color or any other shallow surface characteristics. Thanks in advance.
