HEARING LOSS LINKED TO SEVERAL HEALTH PROBLEMS-POSTPONING TREATMENT COMES WITH RISKS

professional for diagnosis and treatment. However, there are several compelling reasons why you Can heart disease affect your hearing? The simple answer is yes! It's all about blood flow. Studies have report depression, anxiety, and paranoia and were less likely to participate in organized social activities, shouldn't wait. Doing so hinders your ability to experience life to its fullest and causes an unnecessary shown that good circulation plays a role in maintaining good hearing health. Conversely, inadequate blood compared to those who wear hearing aids. burden on your relationships with friends and family. Taking action early is also good for your overall well- flow and trauma to the blood vessels of the inner ear can contribute to hearing loss. being, as untreated hearing is linked to many other serious health concerns.

experience tinnitus which is a often constant ringing in the ears. Roughly 90% of those (45 million) have hearing loss. Yet less than 30% have ever tried hearing aids. Several new studies showing how hearing loss effects overall health may start to change that

In a study that tracked 639 adults for nearly 12 years, Johns Hopkins expert Frank Lin, M.D., Ph.D, and Research Group, an alliance between NCOA and Market Strategies, Inc. with a severe hearing impairment were five times more likely to develop dementia

That's because the delicate hair cells in the cochlea, which play an important role in translating the noise When hearing loss is ignored and left untreated, the auditory system is deprived of sound. Because these hair cells do not regenerate, it results in permanent hearing loss.

Untreated hearing loss has serious emotional and social consequences for older persons, according to Auditory deprivation leads to increased difficulty understanding words and processing speech. Individuals

his colleagues found that mild hearing loss doubled dementia risk. Moderate loss tripled risk, and people "This study debunks the myth that untreated hearing loss in older persons is a harmless condition," said hearing loss have better success with hearing devices and preserve better hearing sensitivity across their

AUDITORY DEPRIVATION

According to the Hearing Loss Association of America there are an estimated 50 million people who your ears collect into electrical impulses for the brain to interpret as recognizable sound, rely on good Depriving the hearing system of sound results in atrophy of the auditory nerves and speech circulation. Poor circulation robs these hair cells of adequate oxygen, causing damage or destruction. processing areas of the brain. This atrophy is called Auditory Deprivation. Once auditory deprivation has taken place, restoring hearing through the use of hearing aids becomes much

> a major new study by The National Council on Aging (NCOA). The study was conducted by the Seniors with hearing loss often report they hear people speaking but they can't understand what they're saying the words are not clear. The good news is that when identified early and treated quickly, individuals with

Cheryl Ann Johnston Owner Patient Care Coordinator

IN THE WORDS OF OUR SATISFIED PATIENTS

was really nervous about getting hearing aids but Jeff took time to address all my concerns. I really appreciate his no pressure approach and continued care after my fitting. If you think you might have hearing loss, go talk to Jeff & Cheryl at Selective Hearing Centers. They really care about helping people hear better

- CAROL S.

Best experience ever. I couldn't give them a higher recommendation. From test to fittings, everything was professional and hassle-free.

I tried hearing aids before and really felt like they were not worth

the little help they gave me. It just made everything louder but not clearer. I went to several places until I found a person I was comfortable with. Jeff at Selective Hearing Centers was great! He patiently worked with me (even when I was grumpy) to get the hearing aids set right. He did a test that showed just how well I was hearing. Now I love how I hear! Today's hearing aids are great but Jeff really took the time to make sure I was doing the best I could. I am glad I didn't give up.

Selective Hearing Centers gave me back my life. They had the best prices and great service. Their coffee is good too!

The experience was life changing. I'm calmer, and more comfortable than I ever imagined. I would recommend Selective Hearing to anyone struggling with hearing loss. The Johnston's are the friendliest, and most professional owners I've ever met.

Our experience with Selective Hearing Center - Kenosha has been unparalleled. We have been customers for many years and they have always exceeded our expectations. We are 100% satisfied with their approach and expertise. It is extremely rare to find a business that is this professional in their approach but at the same time is compassionate and thoughtful in their way of dealing with customers. We are extremely happy they are back in our community and are gratified that the hearing aspect of our health is in great hands. Our support of them is without question.
