

Forecast for Sunday, May 3, 2026

Bands separate high temperature zones for the day.

**Pressure**

Showers

Rain

T-storms

Flurries

Snow

Ice

**NATIONAL SUMMARY:** As rain moves off the New England coast today, cool air will linger from Maine to Tennessee. Meanwhile, a few gusty showers will move through the Midwest. Dry and pleasant weather will span from Texas to the Carolinas as thunderstorms drench South Florida. The West Coast and Rockies will also be primarily dry as warm air surges north.
