

Forecast for Tuesday, February 3, 2026

Lines separate high temperature zones for the day.

NATIONAL SUMMARY: A storm will develop across the Ohio Valley tomorrow bringing light snow. Rain and a few thunderstorms will occur from Texas to Tennessee. A few flurries will occur in the Dakotas and New York, but it will be dry elsewhere. Cold air will linger across the Great Lakes and Northeast, though it will not be as cold as the past several days.
