KILLIAN WATER SYSTEM

2019 Consumer Confidence Report
The Water We Drink

We are pleased to present to you the Annual Water Quality Report for the year 2019. This report is designed to inform you about the quality of your water and services we deliver to you every day. Este informe contiene información importante sobre su agua potable. Tradúccalo o háblelo con alguien que lo entienda bien. Our constant goal is to provide you with a safe and dependable supply of drinking water. We want you to understand the efforts we make to continually improve the water treatment process and protect our water resources. We are committed to ensuring the quality of your water. Our water source(s) are listed below:

Table with 2 columns: Source Name, Source Water Type. Row: KILLIAN WELL, Ground Water

The sources of drinking water (both tap water and bottled water) include rivers, lakes, streams, ponds, reservoirs, springs, and wells. As water travels over the surface of land or through the ground, it dissolves naturally-occurring minerals and, in some cases, radioactive material, and can pick up substances resulting from the presence of animals or from human activity. Contaminants that may be present in source water include:

- Microbial Contaminants - such as viruses and bacteria, which may come from sewage treatment plants, septic systems, agricultural livestock operations, and wildlife.
Inorganic Contaminants - such as salts and metals, which can be naturally-occurring or result from urban stormwater runoff, industrial, or domestic wastewater discharges, oil and gas production, mining, or farming.
Pesticides and Herbicides - which may come from a variety of sources such as agriculture, urban stormwater runoff, and residential uses.
Organic Chemical Contaminants - including synthetic and volatile organic chemicals, which are by-products of industrial processes and petroleum production, and can also come from gas stations, urban stormwater runoff, and septic systems.
Radioactive Contaminants - which can be naturally-occurring or be the result of oil and gas production and mining activities.

A Source Water Assessment Plan (SWAP) is now available from our office. This plan is an assessment of a delineated area around our listed sources through which contaminants, if present, could migrate and reach our source water. It also includes an inventory of potential sources of contamination within the delineated area, and a determination of the water supply's susceptibility to contamination by the identified potential sources. According to the Source Water Assessment Plan, our water system had a susceptibility rating of "MEDIUM". If you would like to review the Source Water Assessment Plan, please feel free to contact our office.

In order to ensure that tap water is safe to drink, EPA prescribes regulations which limit the amount of certain contaminants in water provided by public water systems. Food and Drug Administration regulations establish limits for contaminants in bottled water which must provide the same protection for public health. We want our valued customers to be informed about their water utility. If you have any questions about this report, want to attend any scheduled meetings, or simply want to learn more about your drinking water, please contact GILLIS WINDHAM at 225-695-6785.

If present, elevated levels of lead can cause serious health problems, especially for pregnant women and young children. Lead in drinking water is primarily from materials and components associated with service lines and home plumbing. KILLIAN WATER SYSTEM is responsible for providing high quality drinking water, but cannot control the variety of materials used in plumbing components. When your water has been sitting for several hours, you can minimize the potential for lead exposure by flushing your tap for 30 seconds to 2 minutes before using water for drinking or cooking. If you are concerned about lead in your water, you may wish to have your water tested. Information on lead in drinking water, testing methods, and steps you can take to minimize exposure is available from the Safe Drinking Water Hotline or at http://www.epa.gov/safewater/lead.

The Louisiana Department of Health routinely monitors for constituents in your drinking water according to Federal and State laws. The tables that follow show the results of our monitoring during the period of January 1st to December 31st, 2019. Drinking water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants. The presence of contaminants does not necessarily indicate that water poses a health risk.

In the tables below, you will find many terms and abbreviations you might not be familiar with. To help you better understand these terms, we've provided the following definitions:

- Parts per million (ppm) or Milligrams per liter (mg/L) - one part per million corresponds to one minute in two years or a single penny in \$10,000.
Parts per billion (ppb) or Micrograms per liter (ug/L) - one part per billion corresponds to one minute in 2,000 years, or a single penny in \$10,000,000.
Picocuries per liter (pCi/L) - picocuries per liter is a measure of the radioactivity in water.
Treatment Technique (TT) - an enforceable procedure or level of technological performance which public water systems must follow to ensure control of a contaminant.
Action Level (AL) - the concentration of a contaminant that, if exceeded, triggers treatment or other requirements that a water system must follow.
Maximum Contaminant Level (MCL) - the "Maximum Allowed" MCL is the highest level of a contaminant that is allowed in drinking water. MCLs are set as close to the MCLG as is feasible using the best available treatment technology.
Maximum Contaminant Level Goal (MCLG) - the "Goal" is the level of a contaminant in drinking water below which there is no known or expected risk to human health. MCLGs allow for a margin of safety.
Maximum residual disinfectant level (MRDL) - The highest level of a disinfectant allowed in drinking water. There is convincing evidence that addition of a disinfectant is necessary for control of microbial contaminants.
Maximum residual disinfectant level goal (MRDLG) - The level of a drinking water disinfectant below which there is no known or expected risk to health. MRDLGs do not reflect the benefits of the use of disinfectants to control microbial contaminants.
Level 1 Assessment - A study of the water system to identify potential problems and determine (if possible) why total coliform bacteria have been found in our water system.
Level 2 Assessment - A very detailed study of the water system to identify potential problems and determine (if possible) why an E. coli MCL violation has occurred and/or why total coliform bacteria have been found in our water system on multiple occasions.

During the period covered by this report we had the below noted violations.

Table with 3 columns: Compliance Period, Analyte, Type. Row: No Violations Occurred in the Calendar Year of 2019

Our water system tested a minimum of 2 samples per month in accordance with the Total Coliform Rule for microbiological contaminants. With the microbiological samples collected, the water system collects disinfectant residuals to ensure control of microbial growth.

Table with 6 columns: Disinfectant, Date, HighestRAA, Unit, Range, MRDL, MRDLG, Typical Source. Row: CHLORINE, 2019, 0.7, ppm, 0.54 - 0.79, 4, 4, Water additive used to control microbes.

In the tables below, we have shown the regulated contaminants that were detected. Chemical Sampling of our drinking water may not be required on an annual basis; therefore, information provided in this table refers back to the latest year of chemical sampling results. To determine compliance with the primary drinking water standards, the treated water is monitored when a contaminant is elevated in the source water.

Table with 7 columns: Source Water Regulated Contaminants, Collection Date, Highest Value, Range, Unit, MCL, MCLG, Typical Source. Row: FLUORIDE, 6/18/2018, 0.2, 0.2, ppm, 4, 4, Erosion of natural deposits; Water additive which promotes strong teeth; Discharge from fertilizer and aluminum factories

Table with 7 columns: Treated Water Regulated Contaminants, Collection Date, Highest Value, Range, Unit, MCL, MCLG, Typical Source. Row: No Detected Results were Found in the Calendar Year of 2019

Table with 5 columns: Treated Secondary Contaminants, Collection Date, Highest Value, Range, Unit, SMCL. Row: No Detected Results were Found in the Calendar Year of 2019

Environmental Protection Agency Required Health Effects Language: Some people may be more vulnerable to contaminants in drinking water than the general population. Immuno-compromised persons such as persons with cancer undergoing chemotherapy, persons who have undergone organ transplants, people with HIV/AIDS or other immune system disorders, some elderly, and infants can be particularly at risk from infections. These people should seek advice about drinking water from their health care providers. EPA/CDC guidelines on appropriate means to lessen the risk of infection by Cryptosporidium and other microbial contaminants are available from the Safe Drinking Water Hotline (800-426-4791).

There are no additional required health effects notices. There are no additional required health effects violation notices.

Thank you for allowing us to continue providing your family with clean, quality water this year. In order to maintain a safe and dependable water supply we sometimes need to make improvements that will benefit all of our customers.

We at the KILLIAN WATER SYSTEM work around the clock to provide top quality drinking water to every tap. We ask that all our customers help us protect and conserve our water sources, which are the heart of our community, our way of life, and our children's future. Please call our office if you have questions.

This notice will not be mailed directly to the consumer. Should you desire a paper copy of this report, please contact Killian Water System at 225-695-6785.

Regular Meeting of the Mayor and the Board of Aldermen of the Village of French Settlement, March 11, 2020

The Mayor and Board of Aldermen of the Village of French Settlement met at 16015 Hwy. 16, French Settlement, Louisiana on the 11th day of March 2020 at 6 p.m. in regular session convened. The meeting was called to order by Mayor Rhonda B. Lobell with the following members present:

Alderman Teresa Miller, Alderman Kim Demarest, Alderman Gene Eleazar
Municipal Clerk: Pam Melancon
Absent: None
Present: Chief Mosby, Gerald McMorris, Councilman District 6
Guest Speakers: Jeremy Aydell, Wesley Murphy, Garnett Brignac, Father Jason Palermo

A prayer was offered by Father Jason Palermo, and the Pledge of Allegiance was recited by all.

Public Comments on Agenda Items: None

Guest Speakers: Jeremy Aydell, Livingston Parish Chamber of Commerce, Leadership Livingston
Appreciated the turn out for the Playground fundraiser held on March 8, 2020, viewing/presentation/groundbreaking. Four out of nine of our Parish Council members attended the event. Raised \$3,700.00 (\$3,000 was goal). Year to date, they have approved \$13,000 raised.

Wesley Murphy, announced that he intends to qualify to run for Chief of Police for the Village.

Father Jason Palermo, Priest/St. Joseph Catholic Church announced that the church purchased additional land for the use of cemetery in December 2019 and that the rectory is under construction. The Church cemetery is open to parishioners, as well as members of the community. Plots are now for sale. The pricing for Parishioners of the church is \$525.00 and pricing for non-parishioners is \$1,500.00. Allows stacked graves, allows more than one cremains to be buried in one plot. All profit from the cemetery goes into an endowment with proceeds going towards perpetual care of the cemetery. Hopes to one day in the future take over the maintenance of the Community Cemetery.

Garnett Brignac discussed her concern of the conditions and hazards of the Car Wash located at Hwy 16 across from the Town Hall. Since the Flood of 2016 the car wash has been inoperable and that it is known as a "dumping ground" or "illegal activities". Trash at the premises includes needles (drug paraphernalia), deplorable conditions and neighboring residents are tired of picking up trash and it is creating a drainage

Mayor Lobell stated that she'd spoken to the owner, Mr. John McCrory of the car wash and that he'd been by there and cleaned up a few things and is looking to repair the car wash to workable condition so that he could sell it. Residents are concerned about ditches being blocked and may cause flooding. Residents are also concerned that the property values are affected negatively due to the condition of the car wash. Councilman Gerald McMorris stated that we could possibly seek advice from the Village Attorney then go to the Council. Officer Rhoads stated since private property we may be limited in what we can do. Alderman Miller inquired as to if the news media was contacted. Ms Brignac stated no - but that may be a next step.

**Village of French Settlement Proposed Ordinance No. 1 of 2020**  
Alderman Eleazar read aloud Proposed Ordinance No. 1 of 2020.

- YEAS: Miller, Demarest, Eleazar
- NAYS: None
- ABSENT: None

- Adopt Revision #1 of Continuity of Operations Policy (Original 12.02.2019, Revision #1 03.11.2020)** as required by Louisiana Legislative Auditor. Policy updated to reflect current administration, emergency manager and IT firm.

A motion to accept Revision #1 of Continuity of Operations Policy as written was made by Alderman Miller and seconded by Alderman Demarest. A yeay and nay vote were called for and was as follows:

- YEAS: Miller, Demarest, Eleazar
- NAYS: None
- ABSENT: None

- Adopt Revision #1 of Village of French Settlement Vehicle Village-Owned Vehicle Policy (Original 06.27.2018, Revision #1 03.11.2020)** Policy approved by Board of Aldermen on 06.27.2018 updated to reflect current Village owned schedule of vehicles & drivers. Removed words "its designees" from the "Principle" paragraph (page 1 of 11). Provision added to allow for additional estimates for repairs from approved repair facilities as not to be limited to Gerry Lane Chevrolet and to possibly move the business to a Livingston Parish facility. The Mayor read from the policy – Item #6, Page 9 of 11. **Criteria for Participation "The GPS installed tracking system is installed for officer safety and to recover vehicle if stolen. This GPS system shall not be removed, tampered with or adjusted, unless authorized by the Mayor and the Board of Aldermen."** The Mayor stated that it has come to her attention that only two of the Village owned automobiles have GPS beacons installed as required by the policy. At present, Officer Durkin and Officer Ordeaneux units have the GPS beacons. The other two units will have the GPS beacons installed next week as per the original Board approved policy (06.27.2018), Revision #1 (03.11.2020) and for officer safety. Officer Rhoads stated that "he thought that his unit had a GPS".

- YEAS: Miller, Demarest, Eleazar
- NAYS: None
- ABSENT: None

**New Administration Update**

- Quick-Court Software:** Mayor Lobell stated that the administration is exploring software to efficiently process traffic tickets, warrants, payment processing and court dockets. Quick Court is the software that we are exploring. The administration would like to engage Officer Allen Ordeaneux as the project manager for research, implementation and quality control of the software. Phase 1. Research, Phase 2. Implementation, Phase 3. Quality Control. Various discussion regarding that paper ticket booklets are no longer provided by the State Police that the Village will be responsible for printing and the administration & police department must prepare for this. Mayor Lobell stated that Officer Ordeaneux would act as the liaison between admin and PD so that we implement software efficient for both. Alderman Miller stated that she's reviewed the software and it is much more efficient with cross referencing and cleaner dockets in court. Audios from the court proceedings can be attached to the summons in the system. We propose to engage Officer Ordeaneux for the project \$15.00 at a rate per hour out of the budget of the administration.

A motion to proceed with exploration of various ticket/court software and to engage Officer Ordeaneux as project manager at \$15. per hour for the project was made by Alderman Miller and seconded by Alderman Demarest. A yeay and nay vote were called for and was as follows:

- YEAS: Miller, Demarest, Eleazar
- NAYS: None
- ABSENT: None
