3-D MAMMOGRAM*
today!

3-D Mammograms Now Offered

WHY 3-D?

- 41% more invasive cancers found by 3-D than 2D alone.
- 40% fewer false positives.
- 3-D imaging significantly increases cancer detection rates in dense breast tissue.
- Women are called back less often for another look when using 3-D technology.

WALK-IN-WEDNESDAYS

No appointment needed for 2-D or 3-D screening mammograms (Wednesdays 8:30 am - 2:30 pm).

**Not all insurance companies cover 3-D mammography. Please consult your insurance provider for individual coverage details. Traditional 2-D mammography is also available.*
