

# DISAPPEARING CHANNELS?

Changes in your local TV frequencies might make it seem that way. But there's a quick fix.

Something is happening to TVs across America as local channels change their frequencies to open up airwaves for new high-speed wireless services. If you use an antenna to watch free over-the-air TV, you might find that one or more of your channels is missing. But no need to worry. You can fix it in just a few minutes with your TV's remote control.
