Attention Wild Game Customers

After a lot of discussion, we have decided that we will no longer be accepting whole or quartered game carcasses. We will continue to accept boneless trim, but will no longer be cutting and de-boning whole or quartered deer, bear, elk and other wild game.

This was a difficult decision for us. Two of the major factors in making this decision were the continued higher demand for our custom processing as well as the growth of our wholesale business.

We want to thank our loyal customers for the opportunity to serve them over the years and we look forward to continue processing your wild game boneless trim into our wide selection of sausage products.
