TIGUAN

2019 VOLKSWAGEN TIGUAN

Base Price: \$24,295

Wheelbase: 109.8 in.

Length: 185.1 in.

Width: 72.4 in.

Height: 66.3 in.

Motor: 2.0L inline four cylinder, 184 hp, 221 lb.-ft torque

Transmission: eight-speed automatic

The 2019 Volkswagen Tiguan combines Volkswagen's hallmark fun-to-drive character with a sophisticated and spacious interior, flexible seating, and high-tech infotainment and available driver-assistance features.

The Tiguan, redesigned for 2018, marks an evolution in Volkswagen's clean and timeless design DNA. The MQB platform allows for a wider, lower stance than the previous model; the combination of this with sharper character lines and LED lighting gives Tiguan a more aggressive look than ever before.

The exterior design of Tiguan emphasizes its rugged utility. The front bumper, for instance, is similar to the European model's off-road package, complementing the Tiguan's available 4Motion all-wheel-drive system with a 26-degree approach angle. Other indications of its off-road capability are a 23-degree departure angle and 7.9 inches of ground clearance.

Roof rails are standard. The new Tiguan has a lower lift-in height for the tailgate, making it easier to load, no matter what cargo you're

carrying. The available accessory towing hitch can be used to pull up to 1,500 pounds when properly equipped.

The versatility of Tiguan's seating is what sets it apart from the competition. In front-wheel-drive Tiguan models, three rows of seating are standard, including a second-row bench that can recline, slide seven inches fore and aft, fold down, and be split 40/20/40. The 50/50 split third-row provides seating for two, and also folds down.

The interior features modern, high-quality design with a sporty, driver-focused layout, using gloss-grey and chrome details. Standard features now include a multi-function steering wheel and cloth seats with a rhombus pattern that offers a premium look.

Tiguan SE and SEL models feature heated

leatherette seating surfaces along with a leather-wrapped steering wheel; the SEL Premium brings leather seating surfaces and a heated steering wheel.

All 2019 Tiguan models feature Volkswagen's innovative MIB II touchscreen infotainment system. The display utilizes a capacitive-touch sensor (as in smartphone and tablet technology) rather than the more common resistive touchscreens that require pressure, enabling gesture controls like swiping and even pinch-zooming.

The 2019 Volkswagen Tiguan is powered by an advanced version of Volkswagen's EA888 four-cylinder engine. The updated version of the benchmark EA888 four-cylinder, turbocharged, and direct-injection engine uses an innovative modification to the conventional four-stroke

cycle to offer an improved combination of power, efficiency, and responsiveness.

Tiguan can be equipped with the 4Motion with Active Control all-wheel-drive system.

The latest-generation 4Motion system is designed to activate before wheelspin occurs, helping eliminate traction losses. The system achieves this by using an advanced control function based on specific driving conditions.

When operating under a relatively low load or when coasting, the front wheels are driven and the rear wheels are decoupled, helping to save fuel.

However, the rear wheels can be engaged in fractions of a second whenever necessary via the center differential, which is activated by an electro-hydraulic oil pump.
