

“... love it for fresh cows.”

— Karen Hawbaker

“We started Udder Comfort™ 6 years ago on fresh cows and really like the results,” says Karen Hawbaker of Warm Spring Dairy, Chambersburg, Pa. It’s been almost 9 years since losing her husband Rodney in a tragic farm accident. With her faith, passion for dairy and team of positive people, Karen kept the 160-cow dairy going and also helped realize Rod’s dream of a dairy at a children’s home in Bolivia. (<https://wp.me/pb1wH7-4X>)

“This is all I ever wanted to do,” Karen says about milking and working with cows, seeing them reach their potential producing high quality milk, she attributes to the basics, attention to details, good employees and clean, simple protocols.

“We don’t have a lot of cows with issues. Udder Comfort is a part of that. We love it for fresh cows for a few days after calving, and for any type of swelling,” she explains. The rolling herd average is 26,500 pounds and SCC is consistently low at 40 to 50,000.

UDDER COMFORT™

Quality Udders Make Quality Milk

Keep the milk in the system
