

ACADIA

2020 GMC ACADIA

Base Price: \$30,195

Wheelbase: 112.5 in.

Length: 193.6 in.

Width: 75.4 in.

Height: 66 in.

Engine: 2.0L Turbocharged I4 DOHC with direct injection and Active Fuel Management

Transmission: Hydra-Matic 9T65 nine-speed automatic

Smarter technologies in the 2020 GMC Acadia, including a new available turbo engine and the latest GMC infotainment system, along with a fresh look, offer greater versatility for customers on the go.

The lineup includes SLE, SLT, an all-new AT4 trim and GMC's flagship Denali, with available seating arrangements for five, six or seven passengers, depending on the model.

"The 2020 Acadia is stylish, functional and capable with more of the smart convenience and connectivity features that customers rely on every day," said Duncan Aldred, vice president of Global GMC.

Design and Tech Highlights

- Bolder exterior design with standard LED lighting and signature GMC C-shape lighting, complemented with interior refinements.
- Introduction of the first-ever Acadia AT4 with more aggressive exterior styling and darkened finishes.
- New available 2.0L turbocharged engine that uses an innovative tripower valvetrain and dual-scroll turbocharging technologies to help optimize performance and efficiency in all driving conditions.
- New nine-speed automatic transmission

developed to provide a greater balance of performance and efficiency, along with enhanced refinement.

- New Electronic Precision Shift that replaces the conventional shifter with an electronic control that frees up interior room, including a more versatile center console with greater storage space.
- Enhanced GMC infotainment system that is more intelligent and intuitive, offering new features designed to help improve the user experience and offer more personalization.
- New Head-up Display (late availability).

Refinements

At a glance, the '20 Acadia distinguishes itself with a new grille, new front and rear fascias and GMC's signature C-shaped lighting. An all-new Acadia AT4 expands the reach of GMC's newest sub-brand. Its bold styling cues, including a black chrome-accented grille, add a rugged, off-road-inspired design to the Acadia range. A 3.6L V-6 engine producing 310 hp and 271 lb-ft of torque and a twin clutch AWD

system are standard to the AT4. Unique 17-inch wheels and all-terrain tires are also standard, with 20-inch wheels available.

Other highlights include:

- New 18- and 20-inch wheel designs depending on the trim.
- Outside mirrors with integrated LED turn signals (power-folding feature standard on Denali and available on SLT trim).
- Hands-free power liftgate with GMC logo projection standard on SLT, AT4 and Denali.
- Redesigned center console with enhanced storage space.
- Unique Denali interior color scheme with new, open-pore wood decor.

Innovative Engine Technology

A new 2.0L Turbo engine is standard on SLT and Denali models, expanding the Acadia's propulsion choices for customers and adding a new dimension to its performance.

It leverages GM's innovative tripower valvetrain technology to vary valve lift across the rpm

band, optimizing performance for varied driving demands:

- High valve lift for maximum power.
- Low valve lift for a greater balance of power and efficiency.
- Active Fuel Management (cylinder deactivation) disables two of the cylinders in light load conditions to optimize efficiency.
