

BLEEDING EMERGENCY? KNOW WHAT TO DO?

35% of victims die due to severe bleeding before they get to a hospital in an emergency situation.

SAVE A LIFE

Stop the Bleed is a national awareness campaign and call-to-action, intended to encourage bystanders to become trained, equipped, and empowered to help in a bleeding emergency before professional help arrives.

One of the Stop the Bleed campaign goals is to encourage the general public to acquire the skills and confidence to control bleeding in emergency situations, such as a life-threatening injury from a motor vehicle collision, a stab wound or gunshot wound.

In celebration of ER Nurses Week, our ER nurses are giving back to the community by hosting this important program. We invite you to take part, right here at RAMC.

- **Tuesday, October 9 and Wednesday, October 10**
- **Classes start every hour, on the hour, from 7am to 6pm and last one hour**
- **Location - RAMC Conference Room**
2000 N. Dewey Avenue, Reedsburg
- **Program is free** (trauma kit may be purchased from our gift shop)
- **We're giving away one Trauma Kit each day**
- **Pre-registration not required**

35% of pre-hospital deaths are a result of hemorrhaging.

80% of mass casualty patients are delivered to medical facilities by non-ambulances.

140 is the number of active shooting events recorded from 2000-2015.

Bystanders will always be the first on scene.

Their actions can save lives before the arrival of professional emergency responders.

Stop the Bleed calls for simple life-saving equipment and training to be widely available.
