

As the temperature rises, feed intake starts to drop and performance can suffer.

TAKE ON THE HEAT

this summer with
Generator™ DFMs and
Bovine GoldLyte®

May 15 to July 31

Bio-Vet is offering a summer promotion on top products to support cows and calves during hot weather.

Direct Fed Microbials to *aid digestion, appetite, feed intake and immune function*

- ✓ Generator™ ELITE
- ✓ Generator™ ULTRA Concentrate
- ✓ Generator™ ULTRA Farm Pack
- ✓ ProP169® Farm Pack
- ✓ Generator™ ProSacc™

Electrolyte Products to *aid and maintain hydration and electrolyte balance*

- ✓ Bovine GoldLyte®
- ✓ Calf GoldLyte®

Nutritional Supplements to *aid cattle during nutritional challenges, such as when moldy feed is consumed*

- ✓ KuroFX™

Organic Products for use in organic production systems

- ✓ 'O' Generator™ ELITE
- ✓ 'O' Bovine GoldLyte®
- ✓ 'O' Calf GoldLyte®

BIO[®]
VET

Innovation at Work™

Every cow. Every calving.

Even when times are tough, you work hard to take care of every cow. QuadriCal® takes care of your post-calving calcium needs, and then some.

QuadriCal[®] Calcium Boluses

- 4 calcium sources
- Vitamin D + niacin
- Uncoated for faster absorption
- Two sizes fit all breeds
- Research proven

Research published in the *Journal of Dairy Science* has shown that one feeding of QuadriCal® holds health and economic benefits for every cow. A return on investment of \$44 per cow was calculated based on statistically significant data from a study of over 3,000 cows in New York. The return was due to both increased milk production in certain groups, and reduced incidence of DA, metritis (in low calcium cows) and RP in certain groups¹.
