

LAB TESTED. FIELD PROVEN.

A REVOLUTION 10 YEARS IN THE MAKING

We have nearly 50 years of history behind us, but what farmers are now achieving with our soybeans has everything to do with changes we've made in just the last few years. More local agronomists. More precise identification of superior genetic lines. A 30% increase in R&D centers conducting soybean research trials. More than 600 local testing sites across the U.S. Now, every stage of our soybean program is strong. All systems are go.

THE RESULTS ARE IN

And they're proof positive that Pioneer® brand products can help bring consistent gains to your operation.
