

MAKING LIVES BETTER FROM THE GROUND UP.

Roseburg

WHO WE ARE

We are a closely held forest products company, building value with timberland, safe and efficient manufacturing, and passionate, capable people. We market quality products and provide superior customer service at a profit to sustain growth. We are vertically integrated with timberlands and facilities across North America.

CORE VALUES

- Sawdust in the Veins
- Handshake Integrity
- Driven to Win

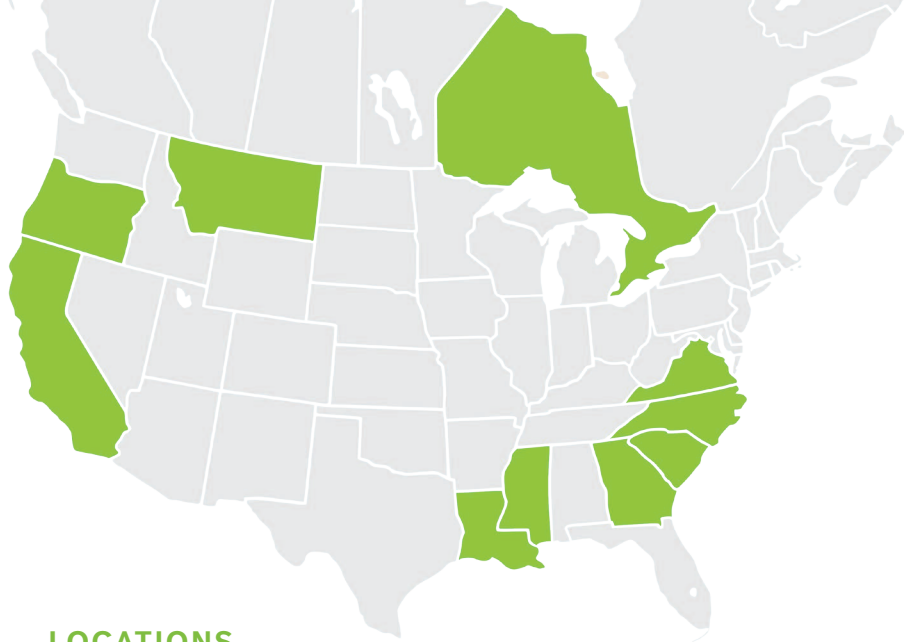

WE OWN and sustainably manage more than 580,000 acres of timberland in Oregon, Virginia and North Carolina. The annual harvest from our timber base ensures the quality and continuity of wood fiber supply to our diverse manufacturing facilities.

WE MARKET our products through a variety of channels which include: Wholesale and Industrial Distributors, National Home Centers, Original Equipment Manufacturers (OEMs), Dealers (Pro Yards), Buying Groups and Custom Laminators and Panelizers.

WE EMPLOY over 3,200 talented and experienced employees located in more than 200 communities throughout the North America.

WE MANUFACTURE products that meet or exceed the highest standards established by the industries in which we operate. Our manufacturing facilities include:

- A **sawmill** in Dillard, OR, with the capacity to produce 500 million board feet of stud lumber each year.
- Three **plywood** facilities in Coquille, Riddle and Dillard, OR, where we produce both hardwood and softwood plywood.
- An **engineered wood products** facility in Riddle, OR, that produces I-Joists and laminated veneer lumber. A second engineered wood plant in Chester, SC, will become operational in 2019.
- Four **particleboard** facilities located in Dillard, OR; Missoula, MT; Taylorsville, MS; and Simsboro, LA.
- Two **medium density fiberboard (MDF)** facilities located in Medford, OR, and Pembroke, Ontario, Canada.
- Three decorative **thermally fused laminate panel** facilities in Missoula, MT; Simsboro, LA; and Dillard, OR; with a combined annual capacity of over 350 million square feet.
- Two **pre-finished panel** facilities in Dillard, OR, and Missoula, MT.
- A **panel cut-to-size** facility in Dillard, OR.
- A **wood chip export** terminal located in Coos Bay, OR. Roseburg is the nation's largest exporter of Douglas Fir wood chips to Japan.
- A **softwood veneer** facility in Weed, CA.
