

# Mammograms Save Lives

**SCHEDULE YOURS TODAY**

**One in every eight women will be diagnosed with breast cancer.** Screening mammograms are key to early detection. A mammogram can detect a lump in your breast months—even years—before you can feel it. The mammograms offered at St. James Hospital are designed to be safe, easy and convenient, performed at our comfortable facility by a caring, knowledgeable staff of mammography professionals.

Learn more, and conveniently schedule your mammogram online at [sjh-mt.org/mammography](http://sjh-mt.org/mammography).
