Cryoskin Body Cryotherapy Spa is happy to announce we are an Elite Master Training Facility for the Cryoskin body contouring device and are now offering Cryoskin 3.0 and Cryoskin 4.0 sessions. If you are looking for a treatment that will help remove those unwanted fatty areas or cellulite areas that are just not budging with diet and exercise alone, this is the treatment for you!

So how does the Cryoskin work? We have a list of all of the most wanted information below. Ready to learn more? It's all about YOU.

Less Fat. More You.

IT'S SCIENCE THAT WORKS

Sub-zero temperatures destroy fat cells in the body, via non-invasive treatments for slimming, cellulite reduction and toning.

Get rid of unwanted fat without surgery or downtime.

With the latest in advanced technology from Paris, Cryoskin offers the most advanced non-invasive treatment solution for slimming and toning. Unlike other treatments, Cryoskin uses science that works with your body's natural systems.

The hot-cold Peltier effect kills fat cells without damaging surrounding tissue and increases oxygen supply that aids in collagen production, resulting in slimmer, toned bodies, and the elimination of fine lines and wrinkles.

Quick and convenient treatments last between 30 – 40 minutes, with no recovery time. Cryoskin has all the fat loss benefits without any lasting side effects or discomfort. 88% of people surveyed found the treatments to be comfortable and relaxing.

In fact, some of our clients feel the session is so comfortable they take the time to catch a quick cat nap.
