a month). Workers spent many days sorting through mountains of donations.

Hy-Vee Food Stores provided a refrigerated semi-trailer for two weeks, donated by the stores' vendors for victims and disaster teams. Donations included soft drinks, potato chips, lunchmeats, paper products, eggs and bread which were collected daily by a Hy-Vee truck and kept at the Salvation Army for use.

The truck was a "real lifesaver," Capt. Tom McDowell said. With that and other help, the Salvation Army served an estimated 20,588 lunches from mobile units for eight days and another 16,000 meals at the building. For two weeks following the disaster, Salvation Army volunteers took meals to public works employees who were working overtime.

Doll Distributing Inc. lent a truck to Red Cross efforts to get needed ice to homes without power. Nearly 5,000 bags were delivered between July 16 and 18.

Foodland, 2801 W. Broadway began giving bagged ice away as soon as the store reopened Sunday. "We are very fortunate that (the storm) went around us; we had no structural damage," said Manager Lowell Hager.
