Methodology: The Oklahoma State Department of Health provides biweekly COVID-19 vaccination coverage data for each ZIP code. The data is a percentage of people in that ZIP code with a First Dose or Fully Vaccinated. The agency only provides percentage ranges in 10% increments. It also does not provide data for ZIP codes below a certain population threshold. The state's vaccination tracking system for COVID-19 vaccines does not include doses provided to the Indian Health Service and administered by most Oklahoma tribes.
