For over 30 years the doctors at Cardiovascular Consultants have been proving their reputation as a premier cardiac diagnostic and treatment group. With over 100 years combined cardiac expertise, they have provided comprehensive cardiac care for thousands of patients throughout Northwest Indiana. Comprehensive quality treatment all in one location. Our location at Donald S Powers Dr features fully equipped and accredited Nuclear and Ultrasound labs; Heart Rhythm clinic providing Pacemaker monitoring, Holter & Event monitoring and Coumadin management; Vein clinic providing specialized procedures including: Painless VenaSeal, Varithena Foam and Infrared Light Treatment for Spider Veins; and Research department offering patient participation in cutting edge pharmaceutical and device clinical research trials. We also have locations at 7127 Indianapolis Blvd. in Hammond, and 9150 W. 109th St., in Winfield, to serve you.

Experts in the treatment of PAD and limb salvage including Endovascular Intervention, Critical Limb Ischemia & Acute Limb Ischemia our interventionalists employ state of the art technology to ensure our patients receive the highest level of care. Our doctors also provide treatment expertise with minimally invasive procedures including angioplasty, atherectomy, evaluation for TAVR (Transcatheter Aortic Valve Replacement) and Watchman Device implantation for AFIB treatment. Keeping up with current trends while also sticking to old values, our doctors provide comprehensive cardiac assessments at convenient locations throughout Lake, Porter & Jasper counties - bringing our quality care to YOU. As an independent practice, we are able to establish payment plans for those who have no insurance, apply sliding scale fee schedules for those who qualify and provide outpatient testing at the most competitive pricing in the REGION.

Our certified physicians and staff look forward to 30 more years of providing comprehensive, competent, compassionate, cost effective care with a holistic approach to improving patients' health through risk assessment, lifestyle changes and medical treatment.
