Majority Statewide Want Marijuana To Be Legal for Medical and Recreational Use

In Indiana, 19 Days Till Hoosier Votes Are Counted, Republicans Positioned to Capture 11 Electoral Votes, Hold State House And Seize Open Attorney General Seat --- But, That Depends on GOP Election-Day Turnout; Democrats Have Early Voting Edge in 2 of 3 Contests:

In an election in Indiana today, incumbent Republican President Donald J. Trump captures the state's 11 Electoral College votes, edging Democratic challenger Joseph R. Biden, 49% to 42%; incumbent Republican Governor Eric Holcomb holds off 2 challengers to keep the State House; and Republican Todd Rokita defeats Democrat Jonathan Weinzapfel in the fight for the state's open Attorney General seat, according to SurveyUSA research crowdsourced on GoFundMe by Andrew Ellison.

Those outcomes are predicated on Republicans, who disproportionately say they plan to vote in person on Election Day, turning out on Election Day, whatever fate the Coronavirus gods and Mother Nature have in store for the Upper Midwest on Tuesday, 11/03/2020. Enough Democrats will have voted before Election Day, whether by US mail or in person, that Biden would defeat Trump and Weinzapfel could defeat Rokita if Election Day turnout collapses for any reason.

At present, Holcomb leads Democrat Woody Myers and Libertarian Donald Rainwater 55% to 25% to 10%. Holcomb leads Myers 3:1 among senior citizens and 2:1 among independents. While Holcomb holds 82% of the GOP base (11% defect to the Libertarian), Myers holds just 59% of the Democratic base; 28% of Democrats cross-over and vote Republican. Voters say the economy is the most important issue in 2020, and among those voters, Holcomb leads Myers 5:1 and leads Rainwater 8:1.

Holcomb has a stunning **Plus 43** Net Approval Rating (67% of voters approve of the job he is doing as Governor, compared to 24% who disapprove. By contrast: Myers has a **Plus 2** Net Favorability Rating, which would not be bad in the final furlong of a fiercely fought general election if 54% of voters did not say they had no opinion of Myers one way or the other. 67% of voters have no opinion of Rainwater.

In the contest to replace Curtis Hill as Attorney General, at this hour it's Rokita 48%, Weinzapfel 35%. Weinzapfel leads in greater Indianapolis, but trails elsewhere in the state.

In the fight for the White House, Biden leads Trump 5:3 in greater Indianapolis, but Trump leads Biden 2:1 in Central Indiana, 3:2 in Southern Indiana and 5:4 in Northern Indiana. Trump leads 5:1 among voters who are strongly pro-life. Biden leads 3:1 among voters who are strongly pro-choice. Biden leads 2:1 among voters who say healthcare is the most important issue, but Trump leads by 48 points among the larger group of voters who say the economy is the most important issue in 2020. Of Biden voters, 39% are voting "against Trump." Just 56% are voting "for Biden."

53% of Indiana adults think marijuana should be legal in Indiana for both medical use and recreational use. Just 16% statewide say marijuana should remain illegal. 24% say marijuana should be legal for medical use but not for recreational use. The majority in conservative Indiana want decriminalization across the board, including 63% of Democrats and 76% of liberals.

3 of 4 adults statewide want Indiana residents to continue to wear facemasks in public spaces.

68% of adults statewide are familiar with the Supreme Court decision in Roe v Wade. Those familiar with the case want Roe to remain the law of the land by 2:1. Just 27% want Roe overturned.

About : SurveyUSA interviewed 900 adults statewide 10/08/2020 through 10/13/2020. Of the adults, 757 are registered to vote in Indiana. Of the registered voters, SurveyUSA identified 527 voters likely to return a ballot on or before the 11/03/2020 deadline. This research was conducted online among a representative cross section of Indiana adults. Sample selected at random by Lucid Holdings LLC of New Orleans. Adult respondents were weighted to the most recent US Census targets for Indiana for gender, age, race, education, and home-ownership. In 2016, Trump carried Indiana by 19 points. In November 2020, multiple overlapping forces are at work to limit the predictive value of public opinion polls. The manner, timing, and way in which many voters will mark a ballot in 2020 will differ from previous elections because of the Coronavirus COVID-19 pandemic. Whether this makes turnout higher than anticipated, lower than anticipated or just different from past elections is unknowable. Whether there will be systemic voter fraud, as the President fears, or isolated and insignificant fraud, is unknowable. What may be newly revealed in the remaining 3 weeks of the campaign is unknowable. Whether there will be no transition of power, a smooth transition of power, or a period of civil unrest is unknowable. As such, this research provides rich insight into the state of play in Indiana at this hour, but may or may not correlate to what "will be" in 19 days.

Statement of Methodology: SurveyUSA is an independent, non-partisan, apolitical research company that conducts opinion surveys for media, academic institutions, commercial clients, non-profits, governments, agencies, and elected officials. SurveyUSA opinion research is conducted using a methodology optimized for each particular project. In some cases, this means data is collected 100% by telephone; in some cases, 100% online; and in other cases, a blend of the two. For those projects that are conducted “mixed-mode” (or “multi-mode”): Respondents who have a home (landline) telephone are interviewed by phone, sometimes using live interviewers, other times using the recorded voice of a professional announcer. The youngest male is requested on approximately 30% of calls to home phones, the youngest adult is requested on approximately 70% of calls. This method of intra-household selection reduces the potential for age and gender imbalance in the unweighted sample. Re-attempts are made to busy signals, no-answers, and answering machines. Landline telephone sample is purchased from Aristotle of Washington DC. Respondents who do not use a home telephone are interviewed on an electronic device, which means, for some projects, that call-center employees hand-dial cell phones and interview respondents verbally on the respondent’s cell phone, and means, for other projects, that SurveyUSA displays the questions visually on the respondent’s phone, tablet, or other device. Sample for respondents who do not use a home telephone is purchased from Aristotle or from one of several other research companies that provide access to cell respondents. Where meaningful, SurveyUSA indicates the percentage of respondents who use a home phone and the percentage who do not, and crosstabs by this distinction. Responses are minimally weighted to U.S. Census or voter file targets for gender, age and race. Target (cell) weighting is used. On questionnaires that ask about political party identification, SurveyUSA may or may not weight to Party ID, depending on client preference. Where necessary, questions and answer choices are rotated to prevent order bias, recency, and latency effects. On some studies, certain populations are over-sampled, so that the number of unweighted respondents exceeds the number of weighted respondents. Each individual SurveyUSA release contains the date(s) on which interviews are conducted and a release date. If interviewing for a particular study is conducted in Spanish, or in any other foreign language, it will be noted on the specific release. If no notation appears, interviews are conducted in English. Where respondents are filtered, such as adults, filtered to registered voters, in turn filtered to likely voters, SurveyUSA describes the filtering on the specific release. On pre-election polls in geographies with early voting, SurveyUSA differentiates between respondents who have already voted and those who are likely to vote but have not yet done so. On research completed prior to 12/31/16, SurveyUSA assigned to each question within the instrument a theoretical margin of sampling error. Effective 01/01/17, SurveyUSA assigns to each question within the instrument a credibility interval, which better reflects the sampling uncertainties associated with gathering some percentage of respondent answers using non-probability sample. Though commonly cited in the presentation of research results, “sampling error” is only one of many types of error that may influence the outcome of an opinion research study. More practical concerns include the way in which questions are worded and ordered, the inability to contact some, the refusal of others to be interviewed, and the difficulty of translating each questionnaire into all possible languages and dialects. Non-sampling errors cannot be quantified. This statement conforms to the principles of disclosure as recommended by the National Council on Public Polls (NCPP). Questions about SurveyUSA research can be addressed to editor@surveyusa.com.
