*"A year ago I had surgery on a finger on my right hand. This March, the same finger on my left hand started doing the same thing. I didn't want to do surgery again, and was referred to Elise & Shawni. I did not know OT was an option for adults. When I started the end of March, my finger had painful swelling and would lock up several times a day. Three months later, I am able to bend my finger again, the swelling is gone, and it only locks up occasionally. Both Elise and Shawni helped me tremendously. I had my doubts that OT would help. I am SO thankful I was wrong."*

## Spinal Decompression Provides an Alternate Solution to Surgery

Dr. Throckmorton performs rehabilitation of the cervical and lumbar spine by decompressing the discs of the neck or low back to relieve pressure on the nerves.

*"I came to see Dr. Throckmorton because I was having a lot of lower neck pain with limited rotation and pain into my arm. I was afraid I was going to need surgery, but now, after several treatments of Decompression Therapy, I feel almost 100% better again."*

**- Brad S. of Fremont**

*"I've lived with constant pain for years. I've had spinal epidurals and other pain injections and they either didn't work or didn't work as well and I was taking a lot of pain medication. Dr. Throckmorton suggested Spinal Decompression Therapy to me. Since I came to see Dr. Throckmorton, I've already cut down the amount of pain medication drastically, and I'm also able to stand and walk for much longer periods of time, and I'm sleeping through the night now. I'm looking forward to more treatments and more improvement! Thanks to Dr. Throckmorton and his warm staff, I have my life back."*
