GRAVES COUNTY HEALTH DEPARTMENT ANNOUNCES THE 152nd THRU 156th CASE OF COVID-19 IN GRAVES COUNTY

Graves County – The Graves County Health Department today announced the 152nd thru 156th confirmed case of coronavirus disease (COVID-19) in Graves County.

- A Graves County resident in her 80's tested positive for COVID-19. She is in isolation in the hospital.
- A Graves County resident in his 30's tested positive for COVID-19. He is in isolation at home.
- A Graves County resident in his 50's tested positive for COVID-19. He is in isolation at home.
- A Graves County resident in her 50's tested positive for COVID-19. She is in isolation at home.
- A Graves County resident in his 50's tested positive for COVID-19. He is in isolation at home.

"We really appreciate the cooperation and kindness that we receive from those that test positive. That is certainly a tribute to our community." said Kathy Gifford, Nurse Supervisor for the local health department.

"With so many businesses opening back up it is important to protect yourself as well as others by staying at a distance as well as frequent hand washing." commented Noel Coplen, Director of the local health department.

We must make social distancing a priority for the sake of our entire community. We all have to be strong.

What The Local Health Department is Doing:

To help limit the spread of COVID-19, social distancing steps have been taken by our community. The contacts of the confirmed positives individuals are under quarantine for the protection of the public.

What The Public Can Do:

- **STAY CALM:** You are not alone in this. Your community is here to support you. Talk to your friends and family and let them know if you are having concerns.
- **STAY APART:** Keep at least 6 feet away from others including while shopping for life-sustaining essentials. Avoid the lines by taking advantage of pick-up or delivery services for groceries and other goods.
- **STAY PUT:** Keep non-essential trips to a minimum and cancel your travel plans. Unless it is essential you go out, stay home.

Be mindful of those who are at greater risk for contracting this virus, including older adults and those with underlying health conditions. Those more at risk should ask others to help with their life sustaining activities, i.e. food, medications or other necessities.

Call your healthcare provider:

If you experience fever, cough, and shortness of breath (flu like symptoms), stay home and call your healthcare provider before going to a healthcare facility. Inform them of your symptoms.
