A new exciting clinical study has shown that a new cream, Neuriterx, is effective in relieving discomfort in just 15 minutes of applying. And according to the study, the results are truly amazing. The cream, identified as Neuriterx, is one of the most effective solutions for those experiencing symptoms related to neuropathy.

The cream, identified as Neuriterx, is one of the most effective solutions for those experiencing symptoms related to neuropathy. Neuriterx is different. Since the most commonly reported symptoms of burning, tingling and numbness are caused by lack of sensation of the nerves, the cream increases their sensitivity. And since these nerves are located right below the skin, we’ve chosen to formulate it as a cream. This allows for the ingredients to get to the site faster and without any serious side effects it might be a challenge to expand, improving circulation in the extremities.

Remarkably, Neuriterx contains one of the few active ingredients that activate TRPA1, a special pathway for the sensory nerves of the entire body. It’s patent pending formula works within minutes of contacting the skin, initiating two pathways that improve blood flow. It’s now being used to relieve burning, tinge, numbness and other discomforts. It does not require a prescription. Read the testimonials below.

Neuriterx is a topical cream that is to be applied directly to the legs and feet, and may be used as often as needed.

How to Claim a Risk Free Supply of Neuriterx

This is the official way to order direct. For consumers who miss out on our current product trials, an exclusive discount is available in your region. Discounts will be available starting today at 6:00AM on a limited discounted supply of 90% of the current product, and will automatically be applied to all callers.
