A new pill brings hope to millions of seniors with bladder control problems. After 14 years of clinical testing across 5 hospitals the pill is now available, and the results are shocking.

Adults over 50 taking the pill are seeing a dramatic reduction in the need to "go". Users are seeing up to 79% less accidental leaks with less urgency and pressure. It's working around the clock during the day and when sleeping at night.

The new pill is called *Bladderol*™. It is proven safe and free of side-effects. And top Urologists are now recommending their patients take this pill instead of costly prescriptions or diapers.

The active ingredient is a nutrient that targets the muscles specifically within the bladder. By strengthening the bladder walls, users can hold fluids longer and without leaks or constant urgency.

"*Bladderol*™ helps reduce many types of leakages. Including those from sneezing, coughing, and other physical activity. It also protects you from not being able to hold off long enough to reach the bathroom. It's ground-breaking. I've never seen anything like it." Said Dr. Jacob Moss, a leading Urologist from Illinois.

New Research Brings Hope To Bladder Control Sufferers

The medical research team behind the amazing discovery knew it was a true success after two findings. Its ability to help seniors hold fluids longer. As well as its ability to stop leaks - also known as incontinence.

This has helped many older adults break free from diapers and heavy pads without worrying about having an accident. Many are reporting they can sleep throughout the night without disruption.

"The last few years I've had trouble with bladder control. Tried many solutions but I had no luck. Very frustrating. But after following the pre-treatment instructions for *Bladderol*™, I now have a new life. Have gone from 8-9 bladder incidents in the day-time down to 2-3; night time from 4-5 to 1-2." Says Margaret Reigle from Louisville, KY.

The American Urological Association estimates - four out of ten adults in the United States live with frustrating bladder troubles. "Many are too embarrassed to discuss it with their family doctor. And while these symptoms can ruin your social life and sense of freedom. There are more serious secondary complications including a urinary tract infection, bladder stones, and kidney stones that can all stem from a simple leaky bladder." Says Dr. Moss

With over 60,000

STRENGTHENS BLADDER + CALMS URGENCY: Top Urologists recommend new *Bladderol*™ to seniors because it cuts leaks and number of trips to urinate by 79% without side effects. Many users are now avoiding diapers and heavy pads.

doses of *Bladderol*™ shipped across the country, there's no doubt that this new solution has struck a chord with frustrated women and men.

Breakthrough Clinical Results

The research behind the new pill was done in 2 hospitals and 3 health clinics for 13 years spanning 2001 to 2014. 5 clinical studies were done on a total of 266 adults between the ages of 52 to 86. All participants suffered from weak and leaky bladder symptoms. Results from the trials were shocking...

Users of the active ingredient in *Bladderol*™ saw major changes. Within 12 weeks users experienced relief from leakages, pressure and urgency to "go" - all without side effects! Trial Users reported less need to urinate during the day and night. In particular they showed:

- 79% reduction in urine leakages
- 57% decline in bathroom trips in the daytime
- 60% less nighttime urinations
- Less pressure and urgency
- Better sleep satisfaction
- Improvements starting within 14 days

Urologists were amazed that a striking 91% of users said all their symptoms "significantly improved" and would continue to take the powerful pill at the end of the clinical trial.

The results were recently published for all to see in the world renowned *Journal of Medicine and Pharmaceutical Science*.

Controls Bladder In Amazing Way

Scientists made the discovery by extracting a new nutrient from two plants, *Curcubita Pepo* and *Glycine Max*. The nutrient is so powerful it was awarded a U.S. patent for urinary health.

The active ingredient is believed to stimulate nitric oxide in the body which increases blood flow to the bladder muscles. This increases the strength and elasticity of the region which gives the bladder more strength to hold fluid, without leaking or the sudden pressure to urinate.

The aging process can make the bladder loose and weak. For women the effects of pregnancy, menopause and infections can take a toll on the bladder. For men, an enlarged prostate causes the bladder to strain harder, weakening the muscles.

According to Dr. Moss, the bladder is similar in structure and function for both men and women. This is why the new potent pill is working for both sexes.

It seems the sales have been booming for *Bladderol*™ because it reduces the number of urinations and leakages in a big way without cutting back on drinking fluids. And without the need for diapers or expensive prescriptions, riddled with side-effects.

Top Doctors Are Pleasantly Surprised

"9 out of 10 seniors saw major progress with their bladder symptoms in 90 days of taking *Bladderol*™. Many witnessed results as quickly as 14-days. Those numbers are quite remarkable." Said Dr. William Shelton, a medical doctor from Seattle.

"I'm impressed with how *Bladderol*™ can cut down the frequency of urination. Plus, hurried sprints to the bathroom. Not to mention, its safe, natural and drug-free. This makes it a great option for older adults with a weak bladder. And a better option over diapers or heavy pads." Said Dr. Eric Wood, a naturopathic doctor from Florida with multiple TV appearances.

"Participants of the clinical study experienced an average of 7.3 episodes of leakage at night. Six weeks later, they dropped to only 1.5—an astounding 79% reduction in urinary frequency and leakage. This makes *Bladderol*™ quite impressive." Dr. Wood added.

How To Get Bladderol™

This is the official release of *Bladderol*™ in Illinois. As such, the company is offering a special discounted supply to any person who calls within the next 48 hours.

A Regional Order Hotline has been setup for local readers to call. This gives everyone an equal chance to try *Bladderol*™.

Starting at 7:00 am today the order hotline will be open for the next 48 hours. All you have to do is call TOLL FREE 1-888-964-6474 and the company will do the rest.

IMPORTANT: Due to *Bladderol*™ recent media exposure, phone lines are often busy. If you call, and do not immediately get through, please be patient and call back. Those who miss the 48-hour special discount offer will pay more for *Bladderol*™.
