

# ARIZONA WINTER OUTLOOK 2024-2025

The Climate Prediction Center's October forecast has a 60% chance of La Niña development during Winter 2024-2025, trending toward a weak La Niña.

Most La Niña winters favor drier than normal precipitation and mountain snowfall in Arizona. This can lead to redevelopment or increased drought conditions, reductions in water supply, and an earlier start to the Spring wildfire season.

## TEMPERATURE OUTLOOK

Overall, the Winter 2024-2025 Outlook favors warmer-than-normal temperatures (40-60%) for Arizona.

## PRECIPITATION OUTLOOK

Overall, the Winter 2024-2025 Outlook favors below-normal precipitation (35-60%) for Arizona.

## Past Weak La Niña Events (DJF) Precipitation
