

THCM 8TH STREET PLAY EXPERIENCE DESIGN VISIONING

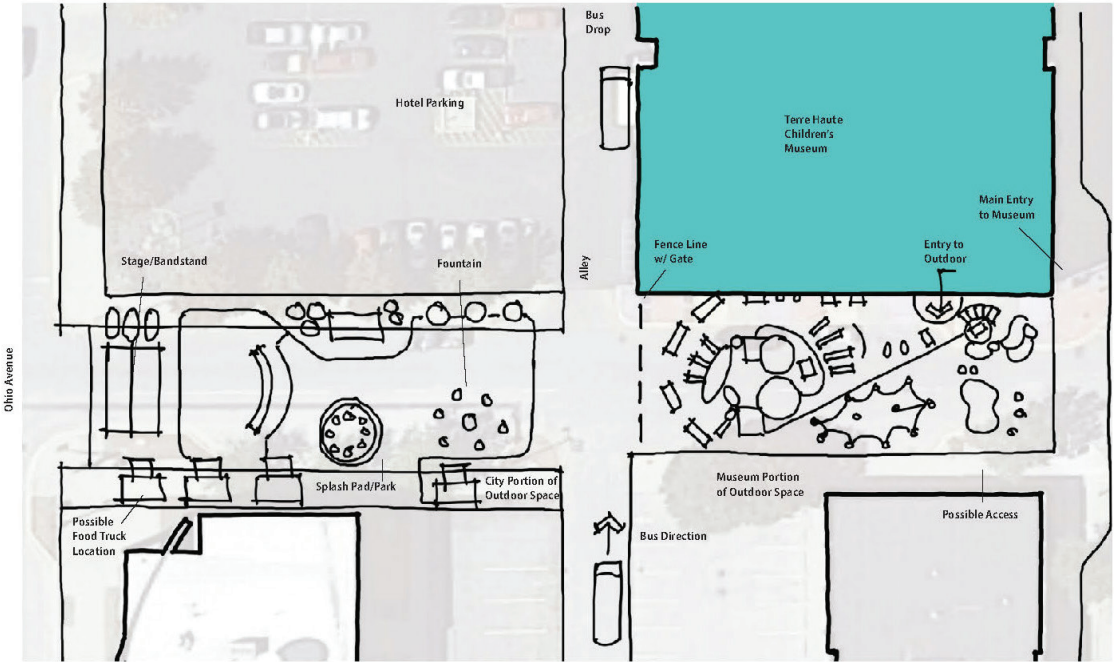

Terre Haute, IN

PHASE FIVE

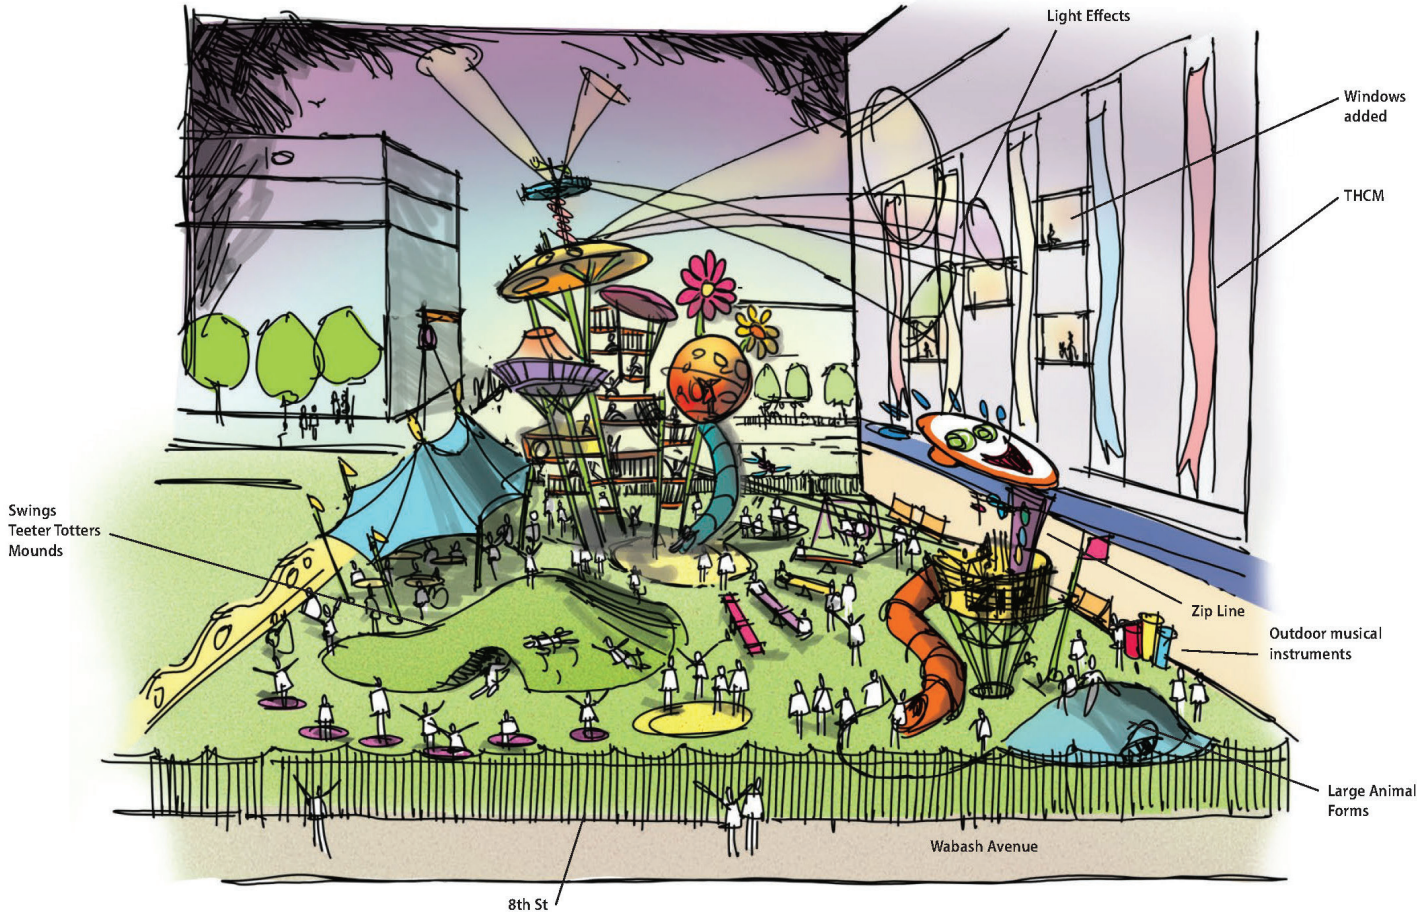

The final phase of the master plan imagines an **outdoor civic space** on Eighth Street between Wabash Avenue and Ohio Street. This area will provide a unique STEM-focused experience for museum visitors and space for regular community programming.

- Imagine an **outdoor STEM exhibit** that takes advantage of nature’s elements – sun, wind, rain, snow – to provide learning experiences that would be difficult to create in an indoor setting. A climbing structure will also provide adults and children with unique views of the downtown area. This portion of the outdoor space will be accessed through the museum and available to ticketed visitors.
- The remaining section of the outdoor space will provide flexible community space that can be used for **family-focused concerts, movies, and events**.

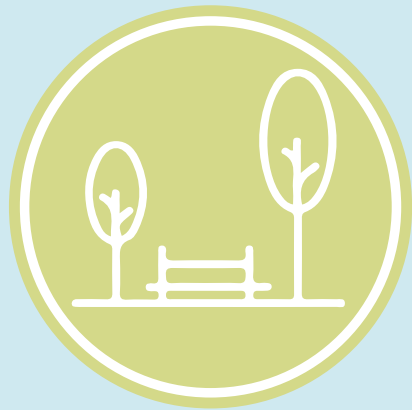

The final design and operating plan for this space must be created with broad community input.

CONCEPT SITE PLAN

**FLEXIBLE + INCLUSIVE
PUBLIC SPACE**

- EVENTS AT THE PERFORMANCE PAVILION
