Health Advice on Eating Fish You Catch

Including Albany, Columbia, Dutchess, Greene, Orange, Putnam, Rensselaer, Rockland, Saratoga, Schenectady, Ulster, Washington, and Westchester Counties

St. . . 3

Why We Have Advice

Fishing is fun and fish are an important part of a healthy diet. Fish contain high quality protein, essential nutrients, healthy fish oils, and are low in saturated fat. However, some fish contain chemicals at levels that may be harmful to health. To help people make healthier choices about which fish they eat, the New York State Department of Health issues advice about eating sportfish (fish you catch). The health advice about which fish to eat depends on:

Where You Fish

The advice on eating fish from the Hudson Valley Region depends upon where you fish. The region has great fishing and many waters where everyone in the family can eat up to four fish meals a month. However, some waters and their tributaries have been affected by industrial chemicals or pesticides, and some by mercury. Our advice is to limit fish meals or avoid eating fish from these waters with specific advice.

Because the Hudson Valley and its waters are very diverse, this booklet includes four regions: the Greater Capital Region, Mid Hudson Region, Catskill Region, and Lower Hudson Region. See page 5 for a map of the regions. If you're planning a fish meal, please read the section *Where can the whole family eat the fish?* in each region.

Who You Are

Women of childbearing age (under 50) and children under 15 are advised to limit the kinds of fish they eat and how often they eat them. Women who eat highly contaminated fish and become pregnant may have an increased risk of having children who are slower to develop and learn. Chemicals may have a greater effect on the development of young children or unborn babies. Also, some chemicals may be passed on in mother's milk.

Women beyond their childbearing years and men may face fewer health risks from some chemicals. For that reason, the advice for women over age 50 and men over age 15 allows them to eat more kinds of sportfish and more often (see advice tables for each region).

What You Catch

There is specific advice about limiting or not eating certain kinds of fish in some of this region's waterbodies (see advice tables). Some fish have higher levels of chemicals than others. In general, smaller fish are less contaminated than larger, older fish of the same species. You can also choose to eat fish from waters not listed in the inside tables (many are listed under *Where can the whole family eat the fish?*) and follow the general advice to eat up to four meals per month.

Chemicals in the Hudson Valley Region

The primary chemicals of concern in the Hudson Valley Region are PCBs and mercury. A few waterbodies have chlordane, dieldrin, dioxin, cadmium and PFCs.

- PCBs (polychlorinated biphenyls), chlordane, and dieldrin are man-made chemicals that were banned in the 1970s and 1980s. Dioxins are byproducts released by a number of activities, including burning of trash, wood fires, and manufacturing. PCBs, chlordane, dieldrin, and dioxin remain in the environment and accumulate in the fat of fish and other animals.
- Mercury occurs naturally, but it is also released into our environment from sources like coal combustion. Testing of fish in the Adirondack and Catskill Regions and in some NYS reservoirs has shown certain species of fish have higher levels of mercury than in other parts of the state.
- Cadmium also occurs naturally and is used in many industrial processes as well. Cadmium and dioxin are found in blue crab tomalley ("green stuff," mustard, liver, or hepatopancreas) in the Hudson River.
- PFCs (perfluorinated chemicals) are man-made chemicals that are used for fire-fighting foams, non-stick materials manufacturing, and many other applications. They are persistent in the environment and can accumulate in living things including fish.

Health Risks

Fish can have chemical levels thousands of times more than the surrounding water. These chemicals build up in your body over time. Health problems that may result from chemicals in fish range from small changes in health that are hard to detect to birth defects and cancer. (Visit www.health.ny.gov/fish for more info.)

Detailed County Maps Available Online

New detailed maps are available that show the health advice for public access waters in many counties including Albany, Dutchess, Orange, Rensselaer, Rockland, Saratoga, Schenectady and Ulster counties. These are the first maps in a statewide series that will become available over time: www.health.ny.gov/fish/maps.htm.

These maps use color coding to highlight waters with our general, regional (Catskill and Adirondack), and specific advisories and show how the advisories apply to tributaries. These maps are a quick, visual guide that can help people make better choices about where to fish for food locally.

Rensselaer County map tributary example showing Hudson River advice extending upstream to first impassable barrier to fish.

What about tributaries and connected waters?

The specific advice in the online county maps and the inside tables applies to tributaries and connected waters if there are no dams, falls, or barriers to stop the fish from moving upstream or downstream. This is because chemicals remain in fish when they move from one waterbody to another.

If you are not sure about possible fish barriers near waters where you are fishing, call your DEC office listed on the back of this brochure. If you have questions about fish advisories for your favorite waterbody call the fish advisory team at (518) 402-7800. Visit www.health.ny.gov/fish for the latest advice about eating your catch for all regions in the state.

Tips for Healthier Eating

- Try to space out your fish meals. For example, if the advice is that you can eat up to four meals a month, don't eat them all in the same week. This is particularly important for women and young children.
- Bacteria, viruses, or parasites can be in or on fish. Keep harvested fish cold. Wear gloves when skinning and trimming. Wash hands and surfaces often when preparing fish, and keep raw foods separate. Cook fish and shellfish thoroughly before eating.
- Do not eat the tomalley ("green stuff," mustard, liver, or hepatopancreas) found in the body section of crabs and lobsters, and discard cooking liquid. Tomalley can contain high levels of chemicals, including PCBs, dioxin, and cadmium.

Tips to Reduce PCBs, Chlordane, Dieldrin, and Dioxin

• PCBs, chlordane, dieldrin, and dioxin are found at higher levels in the fat of fish. Reduce fat by properly trimming, skinning, and cooking your catch:

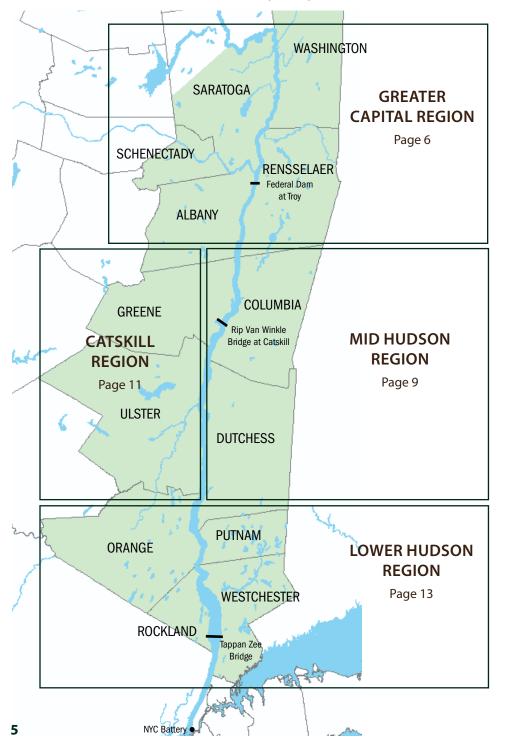

- Cooking or soaking fish cannot eliminate the chemicals, but heat from cooking melts some of the fat. Broil, grill, or bake the trimmed, skinned fish on a rack so that the fat drips away. Do not use drippings in sauces or gravies.
- To reduce exposures to PCBs, chlordane, dieldrin, and dioxin, avoid or eat less American eel, bluefish, carp, striped bass, white and channel catfish, and white perch because these fish tend to have higher levels of these contaminants.

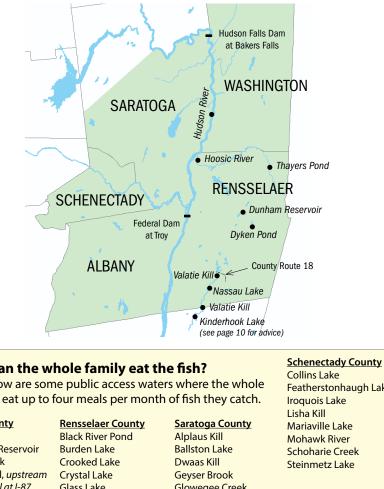

Tips to Avoid Mercury

- The only way to reduce how much mercury you get from fish is to avoid certain species or eat smaller fish within a species.
- To reduce exposures to mercury, avoid or eat less largemouth and smallmouth bass, northern pike, pickerel, walleye, and larger yellow perch (for example, longer than 10 inches) because these fish tend to have higher mercury levels.
- Mercury is distributed throughout a fish's muscle tissue (the part you eat), rather than in the fat and skin. Trimming and skinning will not reduce the amount of mercury in a fish meal.

Hudson Valley Regions

Greater Capital Region Advice

Where can the whole family eat the fish?

Listed below are some public access waters where the whole

family can eat up to four meals per month of fish they catch.

Albany County **Basic Creek** Basic Creek Reservoir Catskill Creek Normans Kill, upstream of waterfall at I-87 Rensselaer Lake (Six Mile Waterworks) Ten Mile Creek Thompson's Lake Tivoli Lake Vly Creek Washington Park Lake

Glass Lake Lona Pond Poesten Kill, upstream of Mt. Ida Falls Shaver Pond Snvder's Lake Tackawasick Creek Tomhannock Reservoir Tsatsawassa Lake

Glowegee Creek Kavaderosseras Creek Mohawk River, upstream

of Rt 32 Bridge

(Waterford)

Moreau Lake

Round Lake

Saratoga Lake

Featherstonhaugh Lake Mariaville Lake Mohawk River Schoharie Creek Steinmetz Lake

Washington County

Batten Kill, upstream of Clark Mills Lower Dam Carters Pond Cossavuna Lake Dead Lake Mettawee River, upstream of waterfalls at Thomas Rd & Upper Tpke

Don't forget that specific advice applies to tributaries and connected waters; see page 3. For example, advice for the Hudson River applies up to the first impassable barrier on all tributaries, including the Batten Kill, Mill Creek, Normans Kill, Poesten Kill, and Wynants Kill.

Check the DEC website for regulations and special restrictions for certain species: www.dec.ny.gov/outdoor/fishing.html.

Greater Capital Region waters with specific advice:

Locations & Tributaries	Fish	Men Over 15 & Women Over 50	Women Under 50 & Children Under 15	Chemical of Concern
All waters NOT listed (Greater Capital Region)	All fish	Up to 4 meals/month	Up to 4 meals/month	
	Walleye	DON'T EAT	DON'T EAT	Mercury
Dunham Reservoir	Smallmouth bass	Up to 1 meal/month	DON'T EAT	Mercury
	All other fish	Up to 4 meals/month	DON'T EAT	Mercury
Dyken Pond	Largemouth bass	Up to 1 meal/month	DON'T EAT	Mercury
	All other fish	Up to 4 meals/month	DON'T EAT	Mercury
Hoosic River	Brown trout	Greater than 14", up to 1 meal/month; Less than 14", up to 4 meals/month	DON'T EAT	PCBs
	All other fish	Up to 4 meals/month	DON'T EAT	PCBs
Hudson River, Hudson Falls Dam at Bakers Falls to Federal Dam at Troy	All fish	Catch and Release fishing ONLY per NYS DEC regulations. Take No Fish. Eat No Fish.	Catch and Release fishing ONLY per NYS DEC regulations Take No Fish. Eat No Fish.	PCBs
Hudson River, Federal Dam at Troy to Rip Van Winkle Bridge at Catskill	Alewife, Blueback herring, Rock bass, Yellow perch	Up to 1 meal/month	DON'T EAT	PCBs
	All other fish (including Striped bass and Walleye)	DON'T EAT	don't eat	PCBs
Nassau Lake	All fish	DON'T EAT	DON'T EAT	PCBs
Thayers Pond - Hoosick Falls Area	All fish	DON'T EAT ³	DON'T EAT ³	PFCs
Valatie Kill, between County Rt. 18 and Nassau Lake	All fish	DON'T EAT	DON'T EAT	PCBs

Greater Capital Region waters with specific advice, continued:

Locations & Tributaries	Fish	Men Over 15 & Women Over 50	Women Under 50 & Children Under 15	Chemical of Concern
Valatie Kill, between Nassau Lake and Kinderhook Lake	American eel, Bluegill sunfish, Redbreast sunfish	Up to 1 meal/month	DON'T EAT	PCBs
	All other fish	Up to 4 meals/month	DON'T EAT	PCBs

³ Effective 7/24/17: Preliminary results indicate that fish from these waters have elevated levels of perfluorinated chemicals (PFCs), compared to fish from other waters. Until testing is complete, DOH recommends that people who fish these waters return their catch.

Mid Hudson Region Advice

Where can the whole family eat the fish?

Listed below are some public access waters where the whole family can eat up to four meals per month of fish they catch.

<u>Columbia County</u>	Dutchess County	Ulster County
Claverack Creek, upstream of	Crum Elbow Creek, upstream	Louisa Pond
Van De Carrs Dam	of Lower Dam	Sturgeon Pool
Copake Lake	Fishkill Creek, upstream of NY	Wallkill River,
Kline Kill	Rubber Company Dam	upstream of
Lake Taghkanic	Iron Mine Pond	Sturgeon Pool
Ore Pit Pond	Morgan Lake	
Queechy Lake	Roeliff Jansen Kill, upstream of	
Roeliff Jansen Kill, upstream of	Bingham Mill Dam (Columbia Co)	
Bingham Mills Dam	Shekomeko Creek	
Taghkanic Creek	Sprout Creek	
Weed Mines Pond	Stissing Pond	
	Tenmile River	
	Wappinger Creek, upstream of	
	Wappinger Falls Dam	
	Webatuck Creek	

Check the DEC website for regulations and special restrictions for certain species: www.dec.ny.gov/outdoor/fishing.html.

Mid Hudson Region waters with specific advice:

Locations & Tributaries	Fish	Men Over 15 & Women Over 50	Women Under 50 & Children Under 15	Chemical of Concern
All other waters NOT listed (Mid Hudson Region)	All fish	Up to 4 meals/month	Up to 4 meals/month	
Hudson River, Federal Dam at Troy to Rip Van	Alewife, Blueback herring, Rock bass, Yellow perch	Up to 1 meal/month	DON'T EAT	PCBs
Winkle Bridge at Catskill	All other fish (including Striped bass and Walleye)	DON'T EAT	DON'T EAT	PCBs
Hudson River, Rip Van Winkle Bridge at Catskill to NYC Battery	Crab or lobster tomalley (hepatopancreas, mustard) and cooking liquid	DON'T EAT	DON'T EAT	PCBs, Dioxin, Cadmium
	Channel catfish, Gizzard shad, Walleye, White catfish	DON'T EAT	DON'T EAT	PCBs
	Blue crab meat	Up to 4 meals/month (six crabs per meal)	DON'T EAT	PCBs, Cadmium
	Atlantic needlefish, Bluefish, Brown bullhead, Carp, Goldfish, Largemouth bass, Rainbow smelt, Smallmouth bass, Striped bass, White perch	Up to 1 meal/month	DON'T EAT	PCBs
	All other fish	Up to 4 meals/month	DON'T EAT	PCBs
Kinderhook Lake	American eel	Up to 1 meal/month	DON'T EAT	PCBs
MILLERIOOK LAKE	All other fish	Up to 4 meals/month	DON'T EAT	PCBs
Valatie Kill, between Nassau Lake and Kinderhook Lake	American eel, Bluegill sunfish, Redbreast sunfish	Up to 1 meal/month	Don't eat	PCBs
	All other fish	Up to 4 meals/month	DON'T EAT	PCBs

Don't forget that specific advice applies to tributaries and connected waters; see page 3. For example, advice for the Hudson River applies up to the first impassable barrier on all tributaries, including Black Creek, Catskill Creek, Claverack Creek, Crum Elbow Creek, Esopus Creek, Fishkill Creek, Kaaterskill Creek, Kinderhook Creek, Roeliff Jansen Kill, Rondout Creek, Stockport Creek, and Wappinger Creek.

Catskill Region Advice

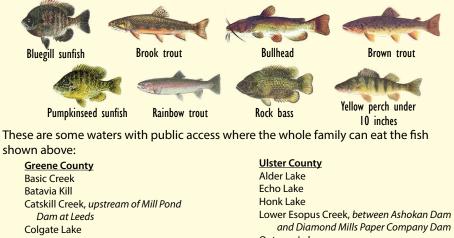

Some fish in the Catskill Region have higher levels of mercury than in other parts of the state. There is additional advice to limit or not eat certain kinds of fish for women under 50 and children under 15 because some fish tend to have higher levels of mercury.

Women beyond their childbearing years and men may face fewer health risks from mercury and can eat up to four meals a month of all fish from Catskill waters (excluding the waterbodies found in the table on page 12).

Which fish can the whole family eat in the Catskill Region?

These fish are a great choice for the whole family, young and old alike because they have lower levels of mercury. Choose among these fish for up to four fish meals per month from waterbodies not listed in the table on page 12.

East Kill Greens Lake Kaaterskill Creek, upstream of waterfalls at High Falls Extension Mill Rd Schoharie Creek, upstream of Prattsville Barrier Dam Ten Mile Creek West Kill

Onteora Lake Rondout Creek, between Merriman Dam

(Reservoir Dam) and Eddyville Dam Wilson Lake

Catskill Region waters with specific advice:

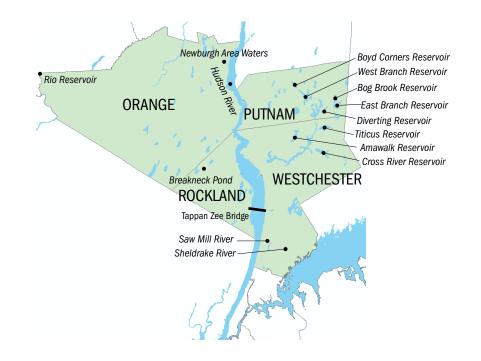

Locations & Tributaries	Fish	Men Over 15 & Women Over 50	Women Under 50 & Children Under 15	Chemical of Concern
	Yellow perch	Up to 4 meals/month	Greater than 10", DON'T EAT ; Less than 10" up to 4 meals/month	Mercury
All other Catskill Region waters NOT listed	Largemouth bass, Northern pike, Smallmouth bass, Walleye, Pickerel	Up to 4 meals/month	DON'T EAT	Mercury
	Brook trout, Bullhead, Brown trout, Rainbow trout, Rock bass, Sunfish, All other fish	Up to 4 meals/month	Up to 4 meals month	Mercury
	Walleye	Up to 1 meal/month	DON'T EAT	Mercury
Ashokan Reservoir	Smallmouth bass	Greater than 16", up to 1 meal/month; Less than 16", up to 4 meals/month	DON'T EAT	Mercury
	All other fish	Up to 4 meals/month	DON'T EAT	Mercury
Chodikee Lake	Largemouth bass	Greater than 15", up to 1 meal/month; Less than 15", up to 4 meals/month	DON'T EAT	Mercury
	All other fish	Up to 4 meals/month	DON'T EAT	Mercury
North-South Lake	Largemouth bass	Greater than 15", up to 1 meal/month; Less than 15", up to 4 meals/month	DON'T EAT	Mercury
	All other fish	Up to 4 meals/month	DON'T EAT	Mercury
Rondout Reservoir	Smallmouth bass	Greater than 16", up to 1 meal/month; Less than 16", up to 4 meals/month	DON'T EAT	Mercury
	All other fish	Up to 4 meals/month	DON'T EAT	Mercury
Schoharie Reservoir	Walleye	Greater than 18", DON'T EAT; Less than 18", up to 1 meal/month	DON'T EAT	Mercury
	Smallmouth bass	Greater than 15", DON'T EAT; Less than 15", up to 1 meal/month	DON'T EAT	Mercury
	All other fish	Up to 4 meals/month	DON'T EAT	Mercury

Don't forget about tributaries and connected waters; see page 3. The advice applies up to the first impassable barrier on all tributaries.

Check the DEC website for regulations and special restrictions for certain species: www.dec.ny.gov/outdoor/fishing.html.
