

ATLANTIC HURRICANE FORECAST

Colorado State University researchers are forecasting a more active than usual hurricane season. They credit a neutral state of the El Nino Southern Oscillation and a warmer than average western Atlantic hurricane basin.

Average

Named storms             **11**

Hurricanes        **6**

Major hurricanes   **2**

Colorado State

Named storms                **14**

Hurricanes         **7**

Major hurricanes    **3**
