

Areas most likely for shore's oldest to be flooded

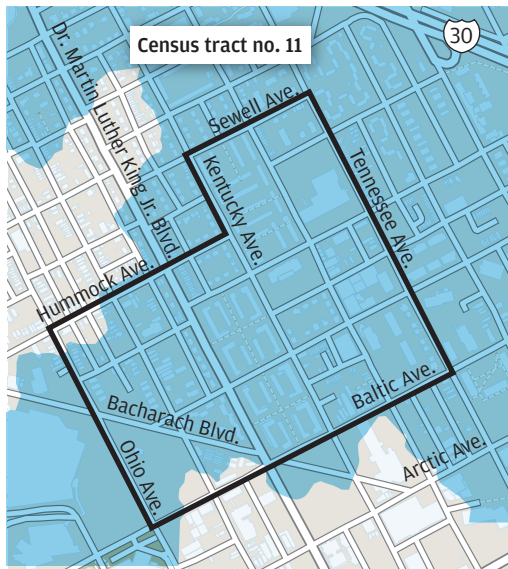

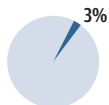

According to research by ClimateCentral, roughly 11,000 people older than 85 years old live in areas that would experience some flooding in a Sandy-like scenario. An estimated 1,786 people over 85 would be completely underwater again. The locations listed all have a percentage of residents over 85 that is higher than the U.S. average and statistically significant.

Atlantic City

Population at
or over 85-
years-old

62

Of those 85 or
older in flood
area

Ocean City

Population at
or over 85-
years-old

381

Of those 85 or
older in flood
area
