Today marks the nationwide release of the OxiTrim pill: the breakthrough diet pill that triggers weight loss. It’s been used safely in France for years. It’s now available in the United States without a prescription.

The pill contains the active ingredient OxiTrim, a pill that burns belly fat... but also helps maintain healthy blood sugar levels. The pill is very affordable. Two dollars per daily dose, or else... OxiTrim’s ingredients twice or dangerous chemicals.

Clinical studies show dieters can lose up to 5 inches from their waistline within just 8 weeks. That’s because OxiTrim works to enhance the body’s ability to burn a specific type of abdominal fat. No stimulants or dangerous chemicals. OxiTrim does not contain stimulants or dangerous chemicals.

The pill even helped maintain healthy cholesterol levels. This is especially good news for anyone who is overweight, given the risks they often face.

How It Works
The active ingredient in OxiTrim triggers weight loss in a way researchers have never seen before. Research shows they activate a protein that breaks down fatty acids found in abdominal fat.

You can think of OxiTrim as the fuse light the fuse in belly fat," said Kenneth. "This ingredient leads to impressive weight loss rates which result in weight loss around the mid section and other parts of the body, too." Kenneth also said, "Dieters should know that OxiTrim is made from natural ingredients. It’s not a drug. It does not contain stimulants or dangerous chemicals.

Plus, unlike a lot of other diet pills, OxiTrim doesn’t increase your heart rate or make you anxious. In fact, you might think OxiTrim sounds too good to be true. Simply take the pill as exactly directed. You will see results and maintain impressive weight loss.

Additionally, the company offers 100% satisfaction guarantees. Those who are dissatisfied will receive 100% of their money back and receive an extra 10% off.
