

2020 Impact Statement – Bad Boy’z Pizza and Pub

To whom it may concern,

This letter is being written to describe our company’s efforts in accordance with City of Moline’s plan to help businesses under the Tier 1 Mitigation restrictions passed down from the state on November 4th, 2020. Under the restrictions, our company has been forced to operate normal business operations outside of our dining room.

The main challenge we face is keeping people comfortable and warm outside as the season begins to turn towards winter and temperatures drop. If we are granted this money, we will use it to help keep our patrons warm and comfortable outside to try and keep a revenue stream coming in from our dine-in operations.

We will focus on outdoor heaters, movable fire pits, and more PPE to be made available to staff and patrons.

We commend the city’s efforts in trying to offset the challenges we face and will work hand in hand as we get past the restrictions. Please do not hesitate to reach out with any questions or concerns in regard to our plans in addressing the Tier 1 Mitigation restrictions and the funding made available by the city of Moline.

Thanks,

Zac Wilken
