

MEN WIRING DAKOTA PLASTER PLANT

The Dakota Power Company has a large force of men at work at Blackhawk wiring the works of the Dakota Plaster Company.

The Plaster Company will use about 250 h. p. The transmission line was completed some time ago and the auxiliary steam plant will soon be in readiness. As soon as the wiring is completed the Dakota Power Company will be ready to furnish power to the Dakota Plaster Company, of Blackhawk.

The starting of the plants of the Dakota Power Company will mean a great deal for Rapid City and the country adjacent as a number of industrial enterprises will be supplied with power by the new company thus adding to the development of the manufacturing interests of this locality.
