Thanksgiving Novena to
ST. JUDE

O Holy St. Jude Apostle and Martyr,
great in virtue and rich in miracles,
near kinsman of Jesus Christ. Faithful
intercessor of all who invoke this
special patronage in time of need. To
you I have recourse from the depth
of my heart and humbly beg you,
to whom God has given such great
power to come to my assistance.
Help me in my present and urgent
petition. In return, I promise to make
your name known and cause you to
be invoked. Say three Our Fathers,
three Hail Marys and three Glory
Be's. Publication must be promised.
St. Jude pray for us and all who invoke
your aid. Amen. This novena has
never been known to fail. It helped
me. Thank you St. Jude for answering
my prayers.

Prayer to the BLESSED VIRGIN

(Never known to fail). O Most Beautiful Flower of Mt. Carmel, Fruitful Vine, Splendor of Heaven, Blessed Mother of the Son of God, Immaculate Virgin, assist me in my necessity. O Star of the sea, help me and show me here in, you are my mother. O Holy Mary, Mother of God, Queen of Heaven and Earth, I humbly beseech you from the bottom of my heart to succor me in my necessity. There are none that can withstand your call. O, show me here-in you are my mother. O Mary conceived without sin, pray for us who have recourse to thee (3 times.) Holy Mary, I place this cause in your hands (3 times). Sweet Mother, I place this cause in your hands (3 times). Holy Spirit, resolve all problems, light all roads so that I can attain my goal. You who gave me the Divine Gift to forgive and forget all evils against me and that in all instances of my life, you are with me. I want this short prayer to thank you for all things as you confirm once again that I never want to be separated from you even in spite of all material things, I wish to be with you in eternal glory. Thank you for your mercy towards me and mine. (The person must say this Prayer on 3 consecutive days. After 3 days the request will be granted to you. The prayer must be published after the prayer is granted.)

“Great job by KFG Concrete Construction! Professional. Timely. Neat.” — Pauline L.
“What a great company to work with! Attention to detail. Very professional. Great crew. I wouldn’t work with anyone else!” — Marie G.
“Flawless work and very efficient.” — Lisa S.
“Total professionalism in all aspects.” — John P.

When you have been a family-run business for 23 years, these reviews mean a whole lot ~ in fact, they mean everything. This kind of customer feedback and satisfaction still matters because longevity in this competitive industry depends on showing up for those loyal customers, time and time again. Consistency. Professionalism. Reliability. Showing up and doing the job right. It’s the kind of reputation that Kevin Gonsalves, the owner and

namesake of KFG Concrete Construction, aspires to with every job. The kind of reputation he and his crew have earned.
KFG Concrete Construction was established in 2002 and has been serving the Rhode Island community with dedication and hard work ever since. KFG Concrete does “the overall planning, coordination and control” of a project from start to finish. They work closely with each client to ensure that the transition from conception to completion is achieved within the client’s budget and timeframe. Kevin Gonsalves explains that the success of his business is built on the collective knowledge, experience and commitment to quality workmanship that has been passed down through the generations.
Whether you are a home or business owner, KFG Concrete will be your go-to

Think SUMMER, and imagine your pathways looking this good, thanks to the concrete work of KFG Concrete Construction. This company has built a solid reputation of quality workmanship, dependability and professionalism for over 25 years.

company for a wide range of projects that involve concrete, including:

- Granite, Multiple Precast, Pour-on-site traditional or stamp steps
- Exposed aggregate
- Stairs
- Driveways, patios & pool aprons
- Pavers
- Chimney repairs
- Masonry repairs

- Wall installs in wood or pavers

On top of all these services, KFG Concrete also has a Landscape Division to help you optimize all your outdoor living spaces.
With summer soon on our doorsteps, now is the time to get outside and put together your wish-list AND your to-do list of outdoor projects.

Are those steps crumbling? Is your driveway filled with potholes and pockets? Does your pool apron need a re-fresh? Isn’t it time to lay that new backyard pathway you have dreamed of? Does your business need a new patio for outdoor dining or are those steps posing a tripping hazard?
Now is the time to reach out to Kevin Gonsalves

and his team at KFG Concrete Construction. For an estimate, contact them at 401-269-1163 (cell/text) or 401-315-8100 (business). To learn more, visit their informative website at www.kfg-concrete.com. You can also see samples of their work on Facebook or Instagram. KFG Concrete is available Monday-Saturday, 6AM – 5PM.

Humane ways to address uninvited garden guests

dig and bury their caches, so a far-off corner with freshly tilled soil along with some berries, nuts and additional treats might attract them to that area instead of a newly established garden.

- **Install fencing.** While chipmunks and squirrels can scale fences easily, such acrobatics may be more challenging for lumbering groundhogs or rabbits. Make digging more difficult by laying chicken wire fencing on top of the soil and stake it down in some areas.
- **Use a scent deterrent.** Some animals are put off by the smell of other animals or aromas they find unpleasant. The capsaicin

in red pepper and cayenne can be off-putting to these animals, so sprinkling it around the garden may ward off pests but not harm the plants. Just reapply after each rain. Similarly, some people have had luck using peppermint. Plant mint around where you do not want the squirrels and chipmunks. Since mint can grow fast and become invasive, it's best to plant in containers and move accordingly.

- **Use water or movement.** Animals can be scared away if they are sprayed with water, so a well-aimed water gun can chase away the animals when a gardener is able to stand watch. It may be easier to set up pin-

wheels that blow in the wind, or hang aluminum pie plates or old compact discs from strings near the garden, which may deter animals from getting too close.

- **Build a greenhouse.** When dealing with tenacious squirrels and chipmunks, the only solution may be to block off all access. Utilize an enclosed greenhouse for the garden, which will keep animals out and even extend the growing season.

Many animals can become nuisances in a yard, particularly in and around gardens. Some humane solutions could remedy the situation.

A Breakthrough Making Grass Seed Smarter and Lawns Greener

(Joan Casanova) In neighborhoods across the country, homeowners are getting extra help in their quest for the elusive, perfect lawn.

The secret? An innovation in grass seed technology known as OptiGrowth, promising faster, stronger and more resilient grass — and it's living up to the hype.

What is the Technology?

A revolutionary, natural seed treatment, OptiGrowth is a unique technology designed to enhance the performance of grass seed, giving it a higher chance of success. It coats traditional grass seed in a protective, moisture-attracting layer designed to retain moisture and kickstart healthy growth without harming the environment.

Developed through years of agricultural research, this technology enhances the natural germination process, giving each seed a better chance to sprout, grow and survive early, tough conditions. It uses water more efficiently, develops stronger roots and shoots, and helps seeds survive in drought, poor soil conditions and extreme temperatures.

Unlike traditional uncoated grass seed, which can struggle in less-than-ideal soil conditions or unpredictable weather, seed treated with this technology is designed to thrive. It's not genetically modified; instead, it's a smarter version of existing seeds, treated to improve

their natural abilities, which leads to faster growth, better health and a thicker, more resilient lawn.

Faster-Growing, Healthier Lawns

One of the biggest advantages of this coated seed is speed. Under ideal conditions, these seeds may germinate faster than untreated seeds. The faster sprouting reduces the vulnerable window when new grass can be overtaken by weeds, dried out by sun or washed away by heavy rains.

Grass seedlings also emerge healthier and develop deeper roots more quickly, setting the stage for a thicker, more resilient lawn. In the early stages, when most lawn failures happen, OptiGrowth seed can better resist stresses like drought, heat and foot traffic.

"New grass is incredibly delicate," said Troy Hake, owner of Outsidepride.com, an online seed company specializing in a wide variety of high-quality grass seed, flower seeds and lawn and garden-related products at competitive prices. "OptiGrowth provides seeds with a built-in advantage: helping more seed survive and thrive. It's like giving each seed its own personal water bottle and first-aid kit."

Water Efficiency is a Key Advantage

As water conservation becomes increasingly important, another major benefit of this seed is improved water usage. The seed coating ab-

sorbs and retains moisture more efficiently around each seed, so homeowners can water less during the critical establishment period when the seed is most vulnerable to drying out. The moisture-holding properties ensure the seed remains hydrated for longer periods, helping it sprout and establish strong roots.

In trials conducted by several university agricultural departments, lawns seeded with OptiGrowth needed up to 30% less water to reach full establishment compared to lawns planted with traditional seed.

"For areas prone to drought or watering restrictions, that's a major win - both for homeowners' wallets and the environment," Hake said.

When Utilizing the Technology Makes Sense

While the coated seed is effective in almost any planting situation, it's especially beneficial in challenging conditions. The coating acts as a shield, protecting the seed from stresses such as temperature fluctuations, heavy rains and dry spells. New lawns on sloped ground, areas with patchy sun and shade, or lawns planted in late spring or early fall - times when weather can be unpredictable - benefit the most.

These seeds are designed to succeed even when conditions aren't ideal by improving moisture retention and boosting germination rates. This means less time reseed-

ing, rewatering and repairing your lawn.

However, Hake notes that in perfect conditions - rich soil, regular rain, mild temperatures — traditional high-quality grass seed can still perform well.

"If you're planting in ideal conditions and you can baby the lawn with watering and care, you might not need OptiGrowth," Hake said. "But in most cases, perfect conditions are rare."

A Greener Future

As innovations like OptiGrowth make their way into more products, it's clear the future of lawn care is working smarter, not harder. These seeds have a built-in advantage - they grow faster, stay hydrated better, have fewer bald spots, require less reseeding and survive tougher conditions, leading to a greener, healthier lawn requiring less effort from you.

Entertainment & Events

1. Where did the melody for The Toys' "A Lover's Concerto" come from?
2. Name the Chicago song that includes the lyric "Eh, cumpari, ci vo sunari."
3. Which group released "Night-shift"?
4. Name the artist who wrote and released "Young Turks."
5. **Name the song** that contains this lyric: "Here we come, walking down the street, We get the funniest looks from everyone we meet."

Answers

1. The melody is Minuet in G Major by Christian Petzold, in 1725. For a long time it was believed that it had been written by Johann Sebastian Bach because the song was found in a compilation by Bach's sister.
2. "Saturday in the Park," in 1972. The Italian lyric comes from "Eh, Cumpari" by Julius La Rosa, in 1953.
3. The Commodores, in 1985. The song charted around the globe.
4. Rod Stewart, in 1981.
5. Theme song from "The Monkees" television show, 1966-1968, starring Micky Dolenz, Michael Nesmith, Peter Tork and Davy Jones. The show was canceled after the second season due to a dispute: The band wanted more guest stars and the TV network didn't. Meanwhile, the show's exposure did make the group very successful.

Strange BUT TRUE

By Lucie Winborne

- **Koala bears have no sweat glands**, so they cool themselves by licking their arms and stretching out as they rest in trees.
- **Asbestos used to be a common sight on film sets**. The carcinogenic mineral was a common substitute for snowflakes in film-making until shortly after World War II.
- **No matter how hot your summer day feels, you won't actually be able to cook an egg on a sidewalk**. That's because you'd need a temperature of at least 158 F, and the highest recorded only reached 131 F. Besides that, concrete isn't a good heat conductor.
- **Inazawa Grand Bowl** bowling center in Japan is the world's largest bowling alley, with 116 lanes.
- **Mars' dust storms**, the planet's defining weather feature, are the largest in the solar system and can last for months.
