President Donald Trump plans to back out of the Paris agreement, which puts the U.S. into this group.

NATIONALLY DETERMINED CONTRIBUTIONS, AS SUBMITTED TO THE UNITED NATIONS

Developed country Developing country

China
Reduce emissions per GDP unit by 60 to 65 percent from 2005 levels by 2030

India
Reduce emissions per GDP unit by 33 to 35 percent from 2005 levels by 2030

United States
Reduce emissions by 26 to 28 percent from 2005 levels by 2025

European Union
Reduce emissions by at least 40 percent from 1990 levels by 2030

Note: The Vatican is not officially part of the Paris agreement, but Pope Francis has publicly supported it. Some parties are part of the agreement but have not formally ratified it. They are already complying and moving toward ratification.

Sources: Paris agreement parties from United Nations. Emissions data from the World Bank as of 2012, the latest available year, unless otherwise noted. Emissions data is not available for some countries after 2000. NDC data from United Nations Framework Convention on Climate Change, projected GDP from OECD, projected U.S. emissions from the State Department via UNFCCC.
