SHEER, SATIN, SHINE

From barely-there dresses to translucent layered skirts and sheer plastic trenches, transparency is adding an unexpected and sexy element to a variety of silhouettes this spring.

FLORALS

While florals for spring may not be groundbreaking, this season will be floral overload. You'll see oversized, dramatic versions in bold and saturated palettes giving this dainty, feminine print a fresh new twist.

MIXED PRINTS

This spring, it's all about bold art deco, funky pop art influences and classic graphic designs, creating a new age harmony of prints to mix and match.

PINK AND PASTELS

Pretty in pink, please! Dusty hues and romantic shades spread across an ultra-feminine palette for a softer approach to spring pieces.
