

Gas prices would drop  
20 to 40 cents per  
gallon, which would  
save consumers  
**\$569 million to  
\$1 billion annually**

The goal is a  
**60%**  
reduction  
in greenhouse gas  
emissions by 2031

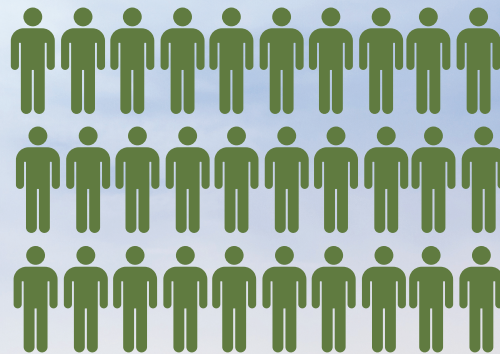

**B20 IS 20%  
BIODIESEL  
AND WOULD  
REDUCE  
CARBON  
INTENSITY BY:**

**E15 GASOLINE  
IS 15% ETHANOL  
AND WOULD  
REDUCE  
CARBON  
INTENSITY BY:**

Offering biofuels  
would prevent  
approximately  
**30 premature  
deaths**  
per year

Increased need for  
**CORN & SOYBEANS**

which would benefit the  
agriculture industry
