Eagle Point Resort Provides Update Following Cottonwood Fire

Today, for the first time since the Cottonwood Fire reached Eagle Point Resort, we were able to return and begin seeing the impact firsthand. We wanted to share an initial update with our community.

First and foremost, our hearts are with everyone impacted by this fire. While it's heartbreaking to see the damage, we are incredibly grateful that everyone was evacuated safely and that no lives were lost at the resort. We also extend our deepest thanks to the firefighters, first responders, and members of the community who worked tirelessly to protect lives and property - your dedication and bravery made a meaningful difference.

While these initial observations only reflect part of the picture, and the full extent of the damage is still being evaluated, here is what we know so far:

Damaged areas and property:

- Approximately 300 of the resort's 600 acres of ski terrain were impacted on the south side of the mountain, primarily along Tushar Ridge (the "Steeps")
- Canyonside Lodge, one of two day lodges, along with more than 100 condos and 30 cabins, were lost in the fire
- 4 of our 5 chairlifts sustained damage, though the full extent is still being determined
- The Warming Station on Tushar Ridge did not survive the fire
- Additional losses include 5 snowmobiles, 3 vehicles, and 3 storage containers containing tools

Areas and infrastructure that remain intact:

- Skyline Lodge, our main on-mountain facility
- Monarch lift on the north side of the resort and surrounding terrain
- Skyline terrain (minimal impact)
- Aspen Crest subdivision is mostly intact, with minimal tree damage
- Snowmaking pond and equipment
- Cell phone and internet towers

This is still an ongoing process. Our team has just begun the work of assessing the property, and it will take time to fully understand the full scope of the damage. We ask for your patience as we gather accurate information and continue to share updates.

To everyone who has reached out with support, offered help, and kept our team, first responders, and community in your thoughts - thank you. Your kindness means more than we can express.

###

Note to Media:

The resort will continue to provide regular updates as additional assessments are completed and more information becomes available.
