We can stop HIV, Iowa— by making sure women are part of the HIV conversation.

Women are less likely to think they're at risk for HIV. Often, they don't get the information they need about HIV or HIV prevention from healthcare providers or their communities.

Thankfully, there are steps all women can take to protect their health:

- Get tested for HIV at least once in your lifetime.
- Request HIV testing any time you get tested for other sexually transmitted infections (STIs).
- Learn about & use the HIV prevention tools that work best for you!
- If you're living with HIV, connect to care and services to stay healthy, live well and protect your partners.
