Motion Sense™
Faucets

Easy Temperature Control
the way YOU want it!

1. Pass your hand over the Wave Sensor at
the top of the faucet spout. MotionSense
will turn your faucet on & run water until
you turn it off.

2. The Ready Sensor detects when you place
your hands or an object below the spout
& supplies water only until you exit the
sensor zone.

3. Use the Handle at any time to turn on
the faucet or adjust flow
& temperature.
