

Corry Kids Review

Did you know that a Komodo dragon can grow up to 10 feet long and can weigh 300 pounds? I found this information from the book Who Would Win Komodo Dragon vs. King Cobra by Jerry Pallotta. I read this book to find out who would win. I will give some information about the Komodo dragon and King cobra in the next paragraphs.

There are so many cool facts about the Komodo dragon and King cobra. One is there are only 3 lizards that are poisonous in the world and the Komodo dragon is one of them. The author states "One King cobra bite has the strength to kill an elephant or 20 people." According to the reading, the King cobra is one powerful snake. Did you know that, "Not only can the King cobra slither on the ground it can also swim and climb trees." I did not know that. These are some facts about Komodo dragons and King cobras.

Did you know that the Komodo dragon can be 10 feet long and weigh 300 pounds? There are so many facts in this Who Would Win book. Some facts are that the King cobra can kill an elephant in one bite, the Komodo dragon is 1 of 3 poisonous lizards in the world, and that the King cobra can also swim and climb. If you would like to see who wins read Who Would Win Komodo Dragon vs. King Cobra.

Olivia

Which animal would you want to win a Whale vs Giant Squid? I the book Who Would Win Whale vs. Giant Squid by Jerry Pallotta, He tells you who would win. I chose this book because I really didn't know much about whales or giant squids. In this book, I will be talking about squids and what they do to try to win a fight and what is on their body and what is on a whale's body.

Did you know that "Giant squids blow ink in the face of the face of the other animal to try to get away" or "that between it's eight legs and it's two feeder arms is the squid's mouth?" Also, "The eye of a sperm whale is only about two inches wide." Something else is that "It is one of the world's largest whales." I bet you probably didn't know this.

Now that you know this information which animal do you think is going to win now? Some would probably say the squid because it can blow out ink and the mouth is also under it's arms and legs. Some people would say the whale would win because it is one of the largest whales but it's eye is two inches wide so it can see better. I encourage you to read this book because Jerry Pallotta makes wonderful Who Would Win books and they're really interesting books!

Have you ever read a Jerry Pallotta book? The book I picked was Hammerhead vs. Bull Shark Who Would Win. Who do you think would win the fight? The reason I selected this book is because they both are strong, big and they both attack people that is why I picked this book. What I will be writing in the next couple of paragraphs some interesting facts about both of the sharks.

In this paragraph, I will be writing about one shark a Hammerhead. The first interesting fact that I found on pg. 04 "The Hammer head shark's head has a strange shape". The second fact is that the Hammer head's scientific name is *Sphyrna Mokarran* on pg. 06 That is two of the many facts about the Hammer head shark.

In this paragraph I will be giving a couple facts about a Bull shark. This shark has attacked more people than any other shark pg. 05 "The scientific name of a bull shark is *Carcharhin us leucus*" pg. 07 Finally, did you know that "Different shark's tails look similar". That is three of the many facts about a Bull shark.

So now, if you never read a Jerry Pallotta book you may want to read one. These are two facts about a Hammer head shark. It's head has a strange shape. The scientific name is *Sphyrna Mokarran*. This is three facts about a bull shark. The shark has attacked more people than any other shark. The scientific name is *Carcharhin us leucus*. Different shark's tails look similar in ways. Jerry pallotta books are really interesting with photos and facts. The Bull shark ends up winning this round.
