

**NOTICE OF INTENT TO ISSUE A PLAN APPROVAL  
AND AMEND A TITLE V OPERATING PERMIT**

Notice is hereby given pursuant to 25 Pa. Code Sections 127.44(b) and 127.424(b), that the Pennsylvania Department of Environmental Protection (DEP) intends to issue Plan Approval 33-00002F to Owens-Illinois Inc. (O-I) for their Owens Brockway Glass Container Plant 19 (Owens Brockway) located at 3831 Route 219, Snyder Township, Jefferson County. The plan approval will subsequently be incorporated into the facility's Title V Operating Permit (TVOP) 33-00002 through an administrative amendment in accordance with 25 Pa. Code Section 127.450.

Owens Brockway is a glass container manufacturing facility which utilizes both post-consumer glass and raw materials. Plan Approval 33-00002F is for the routine rebuild of one glass furnace (Furnace D), increasing the width of an associated Furnace D forehearth, and installation of one new natural gas-fired annealing lehr. Additionally, the increase in natural gas combustion due to this project will result in emission increases for other affected sources at the facility. On September 3, 2025, the DEP received O-I's plan approval application and have developed Plan Approval 33-00002F to address the changes O-I is making to their Owens Brockway facility.

Plan Approval 33-00002F will propose no changes to the existing site-level and source-level conditions that are currently reflected in the facility's TVOP 33-00002. Existing emission and fuel restrictions, testing requirements, monitoring requirements, record-keeping requirements, reporting requirements, and work practice requirements still apply. Final limits will not exceed the values used by O-I in the PSD/NSR netting analysis performed in conjunction with the plan approval. Based on the information provided by the applicant and the DEP's own analysis, the plan approval authorizes an increase in allowable emissions of the following: 5.62 tpy PM; 6.08 tpy PM10/2.5; 0.05 tpy SO<sub>x</sub>; 7.93 tpy NO<sub>x</sub>; 1.25 tpy VOC; and 6.85 tpy CO. Proposed Best Available Technology (BAT) for this project include maintaining baghouses in accordance with manufacturer's specifications and good air pollution control practices for the control of PM emissions, and maintaining sources with good operational/combustion practices.

The subject source(s) will be subject to the applicable requirements of 25 Pa. Code Chapters 123, 127, and 129. The plan approval will contain testing, monitoring, reporting, recordkeeping, and work practice requirements designed to keep the facility operating within all applicable air quality requirements.

Copies of the application, DEP's analysis, and other documents used in the evaluation are available for public inspection between the hours of 8 a.m. and 4 p.m. weekdays at the address shown below. To make an appointment, contact Records Management at 814-332-6340.

Anyone wishing to provide DEP with additional information they believe should be considered may submit the information to the address shown below. Comments must be received by the DEP within 30 days of the last day of publication. Written comments should include the following:

1. Name, address, and telephone number of the person submitting comments.
2. Identification of the proposed Plan Approval; No. 33-00002F.
3. Concise statement regarding the relevancy of the information or any objections to issuance of the plan approval.

A public hearing may be held, if the DEP, in its discretion, decides that such a hearing is warranted on the comments received during the public comment period. All persons submitting comments or requesting a hearing will be notified of the decision to hold a hearing by publication in a local newspaper of general circulation or the Pennsylvania Bulletin or by telephone, where the Department determines such notification is sufficient. Written comments or requests for a public hearing should be directed to Lori McNabb, Air Program Manager, Department of Environmental Protection, Northwest Regional Office, 230 Chestnut St., Meadville, PA 16335, 814-332-6940.
