Preprint: Specifications and Deadlines

**Figuring Preprint Sizes**

Preprinted inserts will be measured as they are unfolded for the reader to read. Unique pages will be counted accordingly.

</tr>
</tbody>
</table>

**Second Piece Discounts**

A discount of 50% will be applied to separate and additional preprints distributed to subscribers on the same day. The discount applies to the preprints with the lower cost and will be taken off the applicable rate card rate. The second preprint must fall within the same zip codes as the first preprint order. The preprint receiving the discount must be distributed to a minimum of 5,000 households per insertion.

**ZIP Code Zoning**

Zoning is available Monday through Saturday. Five thousand (5,000) minimum preprint quantity per insertion required. Daily distribution includes subscribers and single copy in each zip code.

**Blow-ins, Stitch-ins and Preprint Wrap-arounds**

Whenever any of the above products are added to a preprinted insert and they measure 1/2 or less than the page size of the rest of the preprint, it will be charged at 1/2 the page price. If it exceeds a measurement of 1/2 page it will be counted as a full page.

**Preprint Specifications**

**Uncoated Paper / Minimum Caliper:** 0.0048  
**Coated Paper / Minimum Caliper:** 0.0039

**Standard / Tab Insert Sizes:**

- Fold Edge: Maximum 11” Minimum 7”

- Flyer Sizes: Maximum 11” x 11” Minimum 5.5” x 8.5”

**Special insert orders such as envelopes, consumer sample packs, coupon packets, perforated cards, etc.**

a. The advertiser agrees to accept any unanticipated extra costs that may be incurred in handling these special supplements.

b. It would be to the advertiser’s benefit to contact us for packing directions on this type of material. Good packing results in good distribution.

**Shipping Address:**

Grand Island Independent  
422 West 1st St.  
Grand Island, NE 68802
Packing

1. Skidded preprinted supplements should be stacked on solid base non-returnable skids or pallets (pallets preferred). Total height of loaded skids should not exceed 48” from the floor. Skids that exceed 50” from the floor will need to be re-stacked in order to be inserted and a fee of $100 per skid will be assessed.

2. All sections must be well jogged, brick-stacked and banded (except where contained in cartons). Cartons must be used for envelope supplements or inserts containing partial pages or attachments. Cartons must be fully packed or dunnaged internally. The printer should place them in rows in a cardboard box with a divider between the rows. All pieces must be turned one way in a row. If more than one layer is to be used, there should be a cardboard separator on top of each layer.

3. Solid skid tops should conform in size with the base of the skid.

4. Product should be so stacked that it does not protrude beyond the limits of the skid. This practice will help to minimize damage from bands or truck walls.

5. Inserts must be banded on skids or pallets and protected from the weather. A protective cover should be placed on the skid before stacking, and another before topping. This would prevent, to some extent, damp and curled sections which we occasionally encounter due to green lumber and weather conditions during shipment. We also recommend that a sheet of cardboard be used on about every third row. This helps to keep the supplements flat.

6. The folded edges of supplements should be protected from damage at all times. One such way, in the case of a skidded product, is to turn all folded edges toward the center of the skid.

7. In banding skids, the bands should be tight but not to the extent of pulling down and bending the top turn of supplements or pulling loose the flooring of the skid.

8. Skids are not to be double-decked in a truck. These will not be accepted. Turning pallets on a truck to accommodate extra pallets in the shipment is an unsafe practice for our dock workers. Skids and pallets must be pointing toward the door of the trailer so fork lifts can be easily rolled under them.

9. Sections absolutely must not be tied together in bundles with rope, string, wire or rubber bands.

10. Skid or Pallet Requirements
   a. Maximum height (from the floor) . . . . 48”
   b. Height (skid) . . . . . . . . . . . . . . minimum 4”
      (pallet) . . . . . . . . . . . . . . . . minimum 6-1/2”
      (skid or pallet) . . . . . . . . . . maximum 8-1/2”
   c. Width . . . minimum 20-1/2”/maximum 42”
   d. Length . . . . . . . . . . . . . . . maximum 48”
   e. Max Weight . . . . . . . . . . . . . . . . . . 2,000 lbs.
