

# STEM KITS FOR KIDS!

Presented in partnership by...

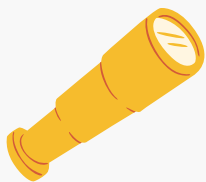

**EMBRY-RIDDLE**  
Aeronautical University™

**PRESCOTT**  
PUBLIC LIBRARY

Prescott Public Library and Embry-Riddle Aeronautical University's STEM Outreach are partnering to provide school age children with an opportunity to learn about STEM with hands-on demonstrations and take-home STEM kits designed for kids in grades K-2. Join us at the Prescott Public Library to explore STEM and pick up your kits!

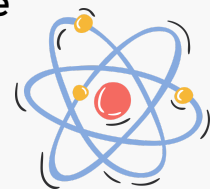

## **Thursday, June 22nd / 2pm-3pm - Telescopes & The Sun**

Learn about the special tools that scientists use to carefully and safely observe the "star" of our solar system...the Sun! Take home a STEM kit with supplies and instructions to make your very own telescope that actually works! **(Prescott Public Library Lawn)**

## **Thursday, July 27th / 2pm-3pm - Static Electricity**

Experiment with static electricity and find out why space scientists need to detect it. Take home a STEM kit with supplies and instructions to build your own working electroscope--an instrument used to detect an electrical charge. **(Prescott Public Library Founders Suite)**

**Don't forget to check out librarian-recommended books on related STEM topics!**
