

Every moment matters. Early detection saves lives.

We're here
for you

Colorectal cancer is the fourth most common cancer in the U.S., but early detection can make all the difference. Screening not only helps catch it early but can also prevent it entirely. When detected early, the survival rate is 90%.

If you're 45 or older, now's the time to take control of your health. Learn more about screening and colorectal care at Mount Nittany Health today.
