Bringing dependability to your job site.

The unexpected happens. A miscalculation or a change of plans, and suddenly you need more supplies than you figured.

No worries. If you place your order before 3:00 pm, we will deliver it to your jobsite the following morning.

Are you ready to get onboard with high quality, convenience, and dependability? Make Sunrise Metal Sales your one-stop metal shop.

NEXT DAY DELIVERY.

CUSTOM TRIM.

“If you can draw the profile, we can bend the metal!”

Have you ever wished for a special piece of trim, maybe to provide a unique touch, or to solve a problem corner?

With our 21-foot Hershey trim brake, we can bend custom profiles for your trim, fascia, drip edges, seam wraps, post wraps, etc. No matter what you need, we are willing to discuss the options.

We also bend standard trim. And thanks to our extra-long trim brake, our trim is rarely spliced.

For small orders of custom trim, using our standard 28 gauge in-stock coil, we can usually bend it while you wait. Larger orders will require more time, but we fulfill all orders within 24 hours.

We can also bend 22-gauge commercial-grade metal. (Note: This may take longer to obtain than standard metal.)

Offering convenience to busy contractors.

No Job is Too Big or Too Small
